

## BEANS

**BNR1 BEAUTY WAY** (*Phaseolus coccineus*) Cert. BD/OG This species of bean is called a runner bean. Beauty Way as a term refers to the Navajo special Ceremony. The lineage of Beauty Way grown by Meadowlark Hearth: from John Rahart New Mexico who received it via Greg Schoen who received it via Wren Kothrade. Wren said this variety was found in Antelope Cave on Fremont Archeological site in northern Arizona. Runner beans originate in the highlands of Central America, where to this day the traditional farmers allow them to grow among the plants of maize (corn) in their fields. Over the centuries the Indigenous peoples traded them which eventually brought them north into Mexico and the Southwest, along with corn and other crops, and adapted them to this more northern latitude. This runner bean is a unique heirloom: colors ranging purples, yellow, browns whites, some with mottled dark spots, and red flowers and sometimes white flowers (as seen with scarlet runner beans). Beauty Way is also the name of a very special "Sing" or Ceremony for the Navajo peoples. Truly a rare and special heirloom. Grown by NB.

**S** \$7.00≈12 seeds

## BUSH BEANS (*Phaseolus vulgaris*)

**NEW! BN5 ROYAL BURGUNDY** (*phaseolus vulgaris*) Cert. BD/OG 50-60 days. Long, tender purple beans turn green when cooked. Grown by NB.

**S** \$3.00=1 oz. **4+ oz.** \$2.75/ oz. bulk rate **1 lb** \$25.00

**NEW! BN6 DRAGON TONGUE** (*phaseolus vulgaris*) Cert. BD/OG Bush wax romano (flat and wider) bean, light yellow with purple stripes which don't remain after cooking. Crisp wide pods which are juicy. Delicious! Grown by NB.

**S** \$3.00=1 oz. **LG** \$20.00=1 lb **4+ oz.** \$2.75/ oz. bulk rate

**BN2 GOLDEN ROCKY** (*phaseolus vulgaris*) Cert. BD/OG 55 days. Tender yellow wax bean. Good producer on compact plants. Grown by NB.

**S** \$3.00=1 oz., sows 20 ft., ≈100 seeds **M** \$25.00=1 lb

**BNBD1 PROVIDER SELECT** (*phaseolus vulgaris*) Cert. BD/OG 50 days. This variety has been the measuring stick for all good green snap-bush beans for many years. After a hail storm late June, a local customer said the bean plants of provider were reduced to just a stem. However, Provider living up to its name leafed out again and is now in August 45 days later producing copious amounts of green beans again! Grown by TVF.

**S** \$3.00=1 oz., sows 4 ft., ≈98 seeds **M** \$10.00=4 oz. **1 lb** \$18.00

## POLE BEANS (*P. vulgaris*)

**NEW! BP4 AUNT ADA'S ITALIAN** Cert. BD/OG 55-60 days. Heirloom came from Italy with the Botanelli family~1900 brought to this country by their Aunt Ada. Pick when beans start to bulge in pods Picking before they bulge, does not allow the full flavor to mature. Delicious and dual purpose, tastes like a buttery snap lima bean when steamed or as a green bean; depodded dried beans are also good as a dry soup bean.

**S** \$3.00=0.5 oz., sows 6 ft., ≈30 seeds **M** \$7.75=2 oz., 20 ft., ≈120 seeds **LG** \$25.00=1 lb

**BP5 EARLY RISER** (AKA: *Kwintus*, *phaseolus vulgaris*) Cert. BD/OG 55 days. Early Romano-type pole bean. Flat, 9 in. long pods. Vigorous vines to 10 ft. Does well in the North. Sow after last frost in warm soil. 1" deep, 3" apart, or grow on poles or tipis placing 5-6 seeds at the base of each .pole.Climbs 6-8 ft. Grown by NB.

**S** \$3.00=1 oz., sows 10 ft., ≈60 seeds **M** \$7.50=4 oz., 40 ft., ≈230 seeds **LG** \$20.00=1 lb, 160 ft., ≈900 seeds

s

**BP1 RATTLESNAKE** (*phaseolus vulgaris*) Cert. BD/OG 70 days. Purple streaked dark green pods on 8-10 foot vines notable for their good flavor. These unusual beans catch the customer's eye at the farmer's market and when cooked look like other green beans. Their brown striped seeds, reminiscent of pinto beans, can also be used as a dry bean. Grown by NB.

**S** \$3.00=1 oz., ≈70 seeds **LG** \$25.00=1 lb, ≈1100 seeds **4+ oz.** \$2.75/ oz. bulk rate

## SOUP BEANS (*P. vulgaris*)

**NEW! BS1 BARB'S BEAUTIFUL BEANS** (*phaseolus vulgaris*) Cert. BD/OG HEIRLOOM . Maroon and white beans with very distinctive markings great for soups. Also known Yin Yang or Calypso. Grown by NB.

**S** \$3.00=1 oz. **16+ oz.** \$10.00/ 4 oz. bulk rate=4 oz.

**BS4 BLACK TURTLE** (*phaseolus vulgaris*) Cert. BD/OG 85-105 days. Bushy plants with good yields of small black beans. Makes delicious soup, baked beans or bean spread.

**S** \$3.00=1 oz. **M** \$5.00=4 oz. **4+ oz.** \$2.75/ oz. bulk rate

**NEW! BS5 BLUE TEPARARY** (*TEPERARY, Phaseolus acutifolius*) Cert. BD/OG 80 days. A traditional Southwestern crop that's drought and heat tolerant. Has a half-runner habit. *Phaseolus acutifolius*. Grown by NB.

**S** \$4.00=1 oz. **M** \$12.00=4 oz. **LG** \$18.00=1 lb

**NEW! BS2 BUCKSKIN** (*phaseolus vulgaris*) Cert. BD/OG 85 days. HEIRLOOM . Abundant production and early. Somewhat sprawling with runners but do not need trellis. Eating quality similar to Pinto when cooked. Golden tan color. Grown by NB.

**S** \$3.00=1 oz. **4+ oz.** \$2.75/ oz. bulk rate **1 lb** \$25.00

**BNT1 PUEBLO'S SAN FILIPE TEPARY** (*TEPERARY, Phaseolus acutifolius*) Cert. BD/OG HEIRLOOM from . Small white heirloom tepary soup bean, native to the Pueblo people in San Filipe area.

**S** \$4.00=1 oz. **M** \$10.00=4 oz. **LG** \$30.00=1 lb

## BEETS

(*Beta vulgaris*) ~2,200 seeds/oz.

**NEW! SALE! BT4 BADGER TORCH** Cert. BD/OG Beautiful elongated golden beet with reddish-gold zoning highlight streaks in the roots and yellow stems in leaves make this of possible interest to restaurants. Pleasant mild, sweet raw or cooked. Introduction by University of Wisconsin, bred by Irwin Goldman. Beet seed embryos do not form well in heat so in order to grow this seed out in our hot dry Nebraska summers, we have put a lot of research and work into figuring out as well as paying royalties to the University of Wisconsin. Therefore we are charging more to support those expenses. Grown by NB. ~2,200 seeds/oz.

**S** \$5.00=1 g, ~50 seeds **M** \$48.00=10 g, ~500 seeds

**BTF8 FEUER KUGEL** (fire ball) Cert. BD/OG 60-65 days. HEIRLOOM from . Switzerland. Smooth round roots. Skin slips off easily when cooked. Remains sweet and tender to a large size. Has natural zoning in some beets which means there are some white concentric circles in the inner part of the beet in many of the beets which also makes it especially sweet. Stores well. Grown to seed by long time Biodynamic grower Heike Maria Eubanks. ~2,200 seeds/oz.

**S** \$4.00=1 g, ~60 seeds **M** \$9.00=7 g, ~400 seeds **LG** \$25.00=1 oz., ~1500 seeds

**BT1 ROBUSCHKA** Cert. BD/OG or **BTO1 ROBUSCHKA** Cert. OG 60-65 days. Vigorous plants with strong tops. Round, smooth-skinned roots are dark red throughout. Selected for its sweet fruit-like taste, it is excellent cooked, grated raw, juiced, pickled or processed. It has been given taste test first place in the Organic Seed Alliance reviews. Similar in appearance to Detroit red. Sow from early spring to mid-summer 10 seeds/ft, " deep, in rows 12-24" apart. Thin to 4" between plants. ~2,200 seeds/oz.

**Catalog # BT1**, Grown by BH and SAT:

**S** \$4.00=0.5 g, sows 5 ft., ~25 seeds **M** \$8.00=4 g, 40 ft., ~200 seeds **LG** \$25.00=1 oz., 280 ft., ~1400 seeds

**Catalog # BTO1**, Grown by BH and SAT:

**S** \$4.00=0.5 g, sows 5 ft., ~25 seeds **M** \$8.00=4 g, 40 ft., ~200 seeds **LG** \$25.00=1 oz., 280 ft., ~1400 seeds  
**4+ oz.** \$22.00/ oz. bulk rate

## BIODYNAMIC FOOD PRODUCTS

**NEW! CO1 ADVICE FOR NEW GARDENERS** Ecologically Grown In case gardening is new to you, order consulting time with our farm with people who have been gardening for over 40 years. Email Beth a phone number

and a time zone you are in and a time and day that works best for you before before you pay for a time: bcorymb at gmail.com

**AL1 ALMONDS AND RAISINS Ecologically Grown** Great tasting Demetercertified Biodynamic almonds. Marion farms is a Biodynamic farm and distillery in Fresno, California. On their website they say: We believe in three things: growing great food, crafting fine spirits (which can be used to make homeopathic medicines), and taking care of the earth. Really, we don't think that the first two are possible without the latter." Meadowlark Hearth orders Marian Farm almonds as well as raisins for MH farm crew! The almonds are delicious! Also the raisins which are Thompson variety. We invite you to check it out their website: [www.marianfarmsbiodynamic.com](http://www.marianfarmsbiodynamic.com)

**--** \$0.00≈0 Other

**ENV ENVELOPE FOR SEED SAVING Ecologically Grown** Handy BLANK PACKET for seed saving trips or going to conferences where there is a seed swap, these small but servicable envelope with measurements of 4 3/16 inch by 2 11/16 inch, their flap is with the small extension to protect seed from falling out of the envelope.

**S** \$4.00≈12 Envelopes **M** \$7.00≈25 Envelopes

**NEW! WHR WHEAT, TURKEY RED HEIRLOOM, HRWW (Triticum aestivum) Ecologically Grown** Cert. BD/OG 300 days. HEIRLOOM. Hard red winter wheat. Turkey Red is the parent to many varieties of hard red winter wheat in the United States. This Turkey Red wheat seed has been grown in Kansas since the 1870s. Straw height can reach upwards of four feet in areas with 20-inches plus moisture. It is adaptable to wet, dry, hot and cold areas. It does require a hard freeze in the winter to develop grain to harvest the following summer. Ideal for bread, but it can be used as a general-purpose flour, ornamental or cover crop. From Stephens Land and Cattle in Kansas. For larger amounts than we list call them: 785-678-7006, From Stephens Land and Cattle in Kansas. For larger amounts than we list call them: 785-678-7006, ≈900 seeds/oz.

**S** \$20.00=1 lb **M** \$30.00=10 lb **LG** \$43.00=20 lb

## BOOKS & CALENDARS

**NEW! SALE! SN25 2025 STELLA NATURA CALENDAR Ecologically Grown** Stella Natura is an interactive calendar. It is especially helpful in teaching us about what is going on in the skies and how the positions and movement of the planetary bodies interact with the development of plants. The actual daily record of what is happening in the sky is from the navigation information of the US navy. A must have tool for farmers and gardeners who wish to experience the heights, breadth and depth of a growing season and one's place in that experience.. The calendar contains a star map as well as the tracking of the positions of planets where they are in each month in relation to the zodiac. Each month is also accompanied with an interesting reflection by a farmer, gardener or orchardist. **\$16.00**

**BK2 DEVELOPING THE SELF Ecologically Grown** What is this book doing on a seed offering website? Answer from Meadowlark Hearth Biodynamic Seed Initiative: If we are to strive toward healing the earth, we must seek out ways to work with ourselves as farmers toward healing. "Individual effort toward development of the higher self is essential for genuine progress on the inner work path. The clear insights and exercises outlined in this book reveal the meaning and necessity of this essential striving in the present consciousness soul age, contributing toward enlivening both our inner and outer work at the same time. The path of developing the self and our work in the world are not separated, but united through the practices and their results." 145 pages, weight: 170 grams or .40 lb **\$17.00**

**BK5 HIDDEN IN THE THIRTEENTH MOON Ecologically Grown** This is a collection of stories from one of the growers of some of our best seed varieties: Lutz, ice cream melon, breeding of Harmony sweet corn, delicata, kindred orange squash. Here is what author Marcia Halligan says about the book of farm stories, she and her partner Steven Adams have nurtured for over a couple of decades: "Farmers and gardeners learn by observing plants, animals and weather conditions. From the author: My years of recording stories in my journals of cats, goats, and horses, as well as our wild creature neighbors led to my book, Hidden in the 13th Moon. Our wild neighbors include insects, birds, animals and reptiles. Practicing awareness strengthens our abilities and enriches our daily lives." This book is helping support her retirement. . **\$12.00**

**NEW! BKG IMAGINING THE GOETHEANUM (subtitle) Ecologically Grown** "An Architectural Exploration in the Language of Polar Logic" is the subtitle to this amazing book of study by Jonathan Alesander. The Goetheanum, located in Dornach, in the county of Solothurn, Switzerland, is the world center for the anthroposophical movement. The building was designed by Rudolf Steiner and named after Johann Wolfgang von Goethe. Quote from the

designer of the Goetheanum: Our building had to be a twofold structure. Its forms express the polar nature of the human being and the architecture of the Goetheanum as well as the principle of polarity is spoken of in one breath. Author Jonathan Alexander explores the Goetheanum's structure in meaningful depth of the polarities to be seen in this unique building design and structure and its surroundings. **\$18.00**

**NEW! BKWW ON WINGS OF WORDS Ecologically Grown** Compiled by Gary Lamb "On the Wings of Words: Conversations and Human Relations: Inner Aspects of the Fundamental Social Law and The Threefold Social Organism We live in [a time when] human beings must become independent. But on what does this depend? It depends on peoples ability to become self-assertive, to not allow themselves to be put to sleep [in their thinking]. It is the antisocial forces that require development in this time, for consciousness to be present. It would not be possible for humanity in the present to accomplish its task if these antisocial forces did not become ever more powerful; they are indeed the pillars on which personal independence rests. At present humanity has no idea how much more powerful antisocial impulses must become. Rudolf Steiner (Dec. 12, 1918) Gary Lamb researched and gathered into this volume the many ways and perspectives that Rudolf Steiner has spoken or written about the profound importance of human relationships, human encounters, and right speaking and listening for engendering and maintaining spiritualized relationships and interpersonal communication, often referred to as Goethean conversation as described by Marjorie Spock. Equally important, Lamb describes how these types of conversations and social dynamics attained through rigorous self-development practices provide the necessary soul-spiritual substance and forces for overcoming evil in modern life and for the implementing the Fundamental Social Law and a threefold social organism. The author approaches all of this from the perspective of the mission of Christ and the Mystery of Golgotha. **\$20.00**

**NEW! BK7 RETHINKING ECONOMICS Ecologically Grown** 14 lectures given by Rudolf Steiner in Dornach, Switzerland July 14-August 6, 1922 (CW 340) 6 seminars in Dornach, July 31-August 5, 1922 (CW 341) In this age of social, economic, and ecological disruption, many people are beginning to realize that perhaps the most important root causes for this crisis originate in an economic thinking that is increasingly out of touch with the social, ecological, and spiritual realities of our time. **\$40.00**

**NEW! BKAC SPIRITUAL FOUNDATIONS FOR THE RENEWAL OF AGRICULTURE (by Rudolf Steiner) Ecologically Grown** These eight lectures given in 1924 inaugurated the Biodynamic farming and gardening movement. Soils, animals, plants, and landscapes are treated with a deep fundamental wisdom and understanding of the inner being of Nature. 328 pgs. soft cover. \$17.50 **\$25.00**

**BK8 THE SEVENTH SHRINE Ecologically Grown** BY ORLAND BISHOP: Knowing that gardens are one of the most cosmopolitan activities, we wanted to share this remarkable writing. From the author: "When I navigate the currents of the soul, I find myself within my ancestral pool. I find myself swimming in their grief, and the longing during the great event and initiation called the Middle Passage. I find myself in their collective soul journey from a place of homeland to a dream of the Promised Land. This book is a telling of the soul striving of people of African heritage into the American experience of creating community." **\$20.00**

**BK3 THE SPIRIT IN THE REALM OF PLANTS Ecologically Grown** This is a very thought provoking lecture given in Dec of 1910. It is part of a trilogy of examination of how the spirit manifests in the various aspects of creation. We are suggesting that you take a look. We will NOT be shipping this to you. You can go online and get this lecture from Rudolf Steiner free. The Spirit in the Realm of Plants: <http://wn.rsarchive.org/Lectures/19101208p01.html> **\$0.00**

## BROCCOLI

(*Brassica oleracea*) ~6,000 seeds/oz.

**BR2 CALINARO Cert. BD/OG 55-60 days.** Photo above Still trialing this it has performed differently in varied years. The original source is from Bingenheim Biodynamic seed company in Germany. Three to four inch heads. Side shoots, sometimes as large as the primary head. We are now offering what we grew out in 2018. Try it and let us know how it does for you! Some variation in it that makes it more of a home gardener broccoli. Grown by NB. ~4,400 seeds/oz.

**Not available in 2025. Please check back in 2026.**

**BR5 PIRACICABA (*Brassica oleracea*) Cert. BD/OG** Between a heading broccoli and broccoli raab. Small loose tender heads good for eating raw or cooked. Lots of side shoots. Leaves are also tasty. Best as a fall crop.

**[S] \$4.00=0.5 g, ~100 seeds [M] \$9.00=2 g, ~400 seeds [LG] \$28.00=8 g, ~1600 seeds**

**NEW! BR8 RASMUS Cert. OG 60-65 days.** The best open pollinated broccoli we have found to date. Strong medium-growing broccoli with gray-green leaves. Solid, fine-grained, big flowering stems. Strong, non-woody stalk.

After main harvest side shoots can be harvested as broccoli sprouts. Mild, fine aromatic taste. Bred especially for organic horticulture in Europe. Grown by hm. *≈4,000 seeds/oz.*

**S** \$4.00≈20 seeds **M** \$9.00=0.5 g, ≈60 seeds **LG** \$24.00=2 g, ≈240 seeds

**BR3 UMPQUA** **Cert. BD 65-80 days.** Open-pollinated! Vigorous plants. Head size varies a lot. Good side shoot production. Recommended for home gardeners, small - medium CSA gardens or farmers markets where the gardener is looking for a replacement for all the hybrid broccoli. If you have plenty of space as a farm, the attribute about Umpqua is the long window of harvesting. This variety was bred by Peters Seed back in the 90's. Hope to have more of this next year. *≈6,000 seeds/oz.*

**S** \$3.00=0.5 g, ≈100 seeds **M** \$8.00=2 g, ≈400 seeds **LG** \$12.00=10 g, ≈1000 seeds

## **CABBAGE** (*Brassica oleracea*) *≈7,000 seeds/oz.*

**CB1 AMARANT** **Cert. BD/OG 75 days.** Early cabbage with a wonderful reddish purple hue. Forms solid heads that store well, so good for either early, mid-season, or late crops. Can store for a couple of months into the winter. *≈5,330 seeds/oz.*

**S** \$4.00=0.125 g, ≈30 seeds **M** \$7.00=1 g, ≈175 seeds

**NEW! CB4 DONATOR** **Cert. BD/OG 90 days.** Tightly wrapped leaves, good production and flavor from Germany. One of the very best cabbages for sauerkraut. The abundantly large heads also make great cole slaw. 120 days, In Nebraska we transplant it in mid May to early June, harvest in September Sow indoors 3-4 seeds per inch, " deep, 4-6 weeks before setting out in garden. At true leaf stage prick out at 1" spacing between plants. Harden off and transplant outdoors 18" to 24" apart. Grown by BH. *≈6,000 seeds/oz.*

**S** \$3.00=0.5 g, ≈100 seeds **M** \$7.00=2 g, ≈400 seeds **LG** \$20.00=0.25 oz., ≈1500 seeds **XL** \$35.00=1 oz., ≈6000 seeds

**CB2 DOTTENFELDER STORAGE** **Cert. BD/OG 90 days.** Exceedingly tight, firm green fast growing heads with a good sweet flavor. Stores well into APRIL from late spring transplanting the previous year!!! Medium large, slightly oval, firm, green heads. Late cabbage with excellent keeping quality. Outer leaves relatively small, slow growing. Inner core quite short. Harvest in autumn taking care to cut and store soon enough to guard against splitting with autumn moisture. Helpful for market gardeners. Stores into the next spring when there are few other vegetables to harvest from the garden. There is variability in the shapes of the heads with some being more flat, some oval and some round showing how diverse yet strong the variety is. Cultivation instructions: Sow indoors 3-4 seeds per inch, " deep, 4-6 weeks before setting out in garden. At true leaf stage prick out at 1" spacing between plants. Harden off and transplant outdoors 18" to 24" apart. Grown by BH and NB. *≈7,000 seeds/oz.*

**S** \$3.00=0.25 g, ≈40 seeds **M** \$11.00=1 g, ≈160 seeds **LG** \$60.00=10 g, ≈1600 seeds **1 oz.** \$90.00≈7000 seeds

**CB3 EARLY BIRD CABBAGE** **Cert. BD/OG 60 days.** Its delicious mild flavor, crisp tender texture, and very early maturity makes this cabbage a winner for CSA's and farmer's markets. Even people who usually do not care for cabbage enjoy its light flavor and crispness. Quick maturity (60 days) allows multiple plantings from early spring through August. Cultivation Instructions: Sow indoors 3-4 seeds per inch, " deep, 4-6 weeks before setting out in garden. At true leaf stage prick out to 1" spacing between plants. Harden off and transplant outdoors 18" apart. Early Bird can be planted before the last frost. It can also mature in the autumn after the frost so it is a good cabbage to do in successions since it matures in 60 days. Grown by NB. *≈5,330 seeds/oz.*

**S** \$4.00=0.5 g, ≈150 seeds **M** \$8.00=2 g, ≈300 seeds

**CB6BD FILDERKRAUT** **Cert. BD/OG** VERY LARGE but the leaves are really tender, excellent for sour kraut with good flavor and also great for early sweet cabbage. Warning: It can grow to 20 pounds if not harvested early. Grown by BH and SAT. *≈7,000 seeds/oz.*

**S** \$4.00=0.5 g, ≈80 seeds **M** \$10.00=2 g, ≈320 seeds **LG** \$25.00=8 g, ≈1200 seeds **XL** \$75.00=1 oz., ≈650 seeds

**CHO1 GRANAT** **Cert. OG 60 days.** Makes 12 in. high, slender yet solid compact heads. Its crisp mild leaves are delicious in stir fries or delicious winter salad. Grown by BH. *≈9,000 seeds/oz.*

**S** \$4.00=0.1 g, ≈25 seeds **M** \$9.00=0.5 g, ≈100 seeds

**CB9 HOLSTEINER PLATTER** Cert. BD/OG 90 days. Vigorous, large headed variety with strong surround leaves. Flattish round head; good for sauerkraut, not suited for storage. Very good flavour.  $\approx 7,000$  seeds/oz.

**S** \$3.00=0.25 g,  $\approx 60$  seeds **M** \$7.00=0.5 g,  $\approx 100$  seeds **LG** \$20.00=2 g,  $\approx 400$  seeds

**NEW! CB7 RODYNDA** Cert. BD/OG 95-110 days. Bred by Dieter Bauer at the 50 year old Biodynamic farm Dottenfelder Hof in Germany. This open pollinated deep-burgundy red storage cabbage with medium-large heads, stunningly beautiful and delicious. Excellent storage type! Sow indoors 3 sds per inch, 1/4 inch, deep, 5 weeks before transplant out. True leaf stage, prick out at 1" spacing. Harden off, transplant outdoors 18" apart. Grown by NB.  $\approx 6,000$  seeds/oz.

**S** \$4.00=0.5 g,  $\approx 100$  seeds **M** \$9.00=2 g,  $\approx 400$  seeds **LG** \$28.00=7 g,  $\approx 1400$  seeds **XL** \$90.00=1 oz.,  $\approx 700$  0 seeds

## CHINESE CABBAGE *(Brassica rapa)* $\approx 9,375$ seeds/oz.

**CHO1 GRANAT** Cert. OG 60 days. For autumn harvest. Sow June-July to beginning of August. 4-6 weeks before the first frost. Makes 11-15 inch high, slender yet solid compact heads. Mild but, refreshing flavour with crisp consistency making it nice for steaming or great for stir fries and excellent for winter salads. Cover with cloth or paper, store at 40 degrees or lower and you will have delicious salad through the winter. A real boon at Farmer's Markets when people are looking for salad ingredients. Best sown in June indoors, 3-4 per inch, inch deep, 4-6 weeks before setting out in garden. At true leaf stage transplant into pots, cells or flats with 1 inch spacing between plants. Harden off and transplant outdoors 12-16 inches apart. Grown by BH.  $\approx 9,000$  seeds/oz.

**S** \$4.00=0.1 g,  $\approx 25$  seeds **M** \$9.00=0.5 g,  $\approx 100$  seeds

## CARROTS *(Daucus carota)* $\approx 18,000$ seeds/oz.

**NEW! CT17 CHANTENAY** Cert. BD/OG 65-70 days. Orange storage carrot that has a great sweetness harvested in the autumn. Shoulders are wide at the top then quickly narrowing for a stump rooted type, 2.5-5 inch roots here in our soils. Beautiful roots and delicious! Our vegetable customers like them a lot. They are very easy to clean.  $\approx 18,000$  seeds/oz.

**S** \$4.00=1 g, sows 20 ft.,  $\approx 500$  seeds **M** \$10.00=3.5 g, 60 ft.,  $\approx 1700$  seeds **LG** \$20.00=1 oz.

**CTBDOG DOLCIVA** Cert. BD/OG 130 days. Quick growing, sweet early carrot with strong tops, resistant to alternaria disease. This open-pollinated variety of carrot holds its own in taste trial comparisons with hybrid varieties. Lives up to the meaning of dolce as sweet.  $\approx 18,000$  seeds/oz.

**S** \$4.00=0.5 g,  $\approx 250$  seeds **M** \$8.00=4 g,  $\approx 2000$  seeds **LG** \$20.00=0.5 oz.,  $\approx 8500$  seeds **4+ oz.** \$25.00/ oz. bulk rate

**CTK1 KURODA** Cert. BD/OG Delicious sweet good textured carrot. Selected here in western Nebraska and reportedly grows well in southern climates such as Florida. Also can be grown in containers and is good for juicing. If your garden has a challenge with carrot fly then plant it in late spring early summer. Grown by NB.

**S** \$5.00=1 g,  $\approx 500$  seeds **M** \$14.00=4 g,  $\approx 2200$  seeds **LG** \$20.00=15 g,  $\approx 8500$  seeds

**NEW! CT7 MILAN NANTES** Cert. OG or SALE! DCT7 MILAN NANTES Cert. BD/OG 72 days. An early, uniform, blunt-ended early carrot that can be forced under row cover for spring bunching carrots. Can even be stored but its highlight is for early bunching. Very good sweet flavor. Our farmer market customers love the flavor! Cultivation instructions: Sow outdoors from early spring to mid-summer. Grow in full sun in rich, loose, deeply worked soil. Sow 1/2 inch deep and -1 inch apart in rows 12 inches apart. Keep moist until seedlings emerge. Thin to 2 inches between plants.  $\approx 18,000$  seeds/oz.

Catalog # CT7, Grown by BH and NB:

**S** \$4.00=1 g, sows 20 ft.,  $\approx 600$  seeds **M** \$10.00=3 g, 100 ft.,  $\approx 1500$  seeds

Catalog # DCT7 on SALE, Grown by BH and NB:

**LG** \$20.00=15 g, sows 400 ft.,  $\approx 9000$  seeds **XL** \$52.00=2 oz., 1200 ft.,  $\approx 36000$  seeds

**CT8 PURPLE DRAGON** Cert. OG 70 days. This carrot is best planted later in the season. Otherwise it tends to bolt when planted early in the spring. Sweet yet pungent, a different taste in carrots, the purple gives a lively coloring to salads and stir fries. Truly purple skin with orange flesh inside. Improved from a USDA strain by Dr. John Navazio,

with lycopene content equal to tomatoes! Novelty appeal for farmer's market customers. Grown by AM.  $\approx 18,000$  seeds/oz.

**[S]** \$4.00=1 g,  $\approx 500$  seeds **[M]** \$8.00=3.5 g,  $\approx 1700$  seeds **[LG]** \$23.00=0.5 oz.,  $\approx 8500$  seeds **[XL]** \$80.00=2 oz.,  $\approx 32000$  seeds **[1 lb]** \$369.00

**CT5 ROLANKA Cert. BD/OG 75 days.** Aromatic rodelika type from Biodynamic breeding in Europe with excellent storage capacity, smooth skin and deep orange color, Rolanka is especially sweet after being cooked so is great variety for sauteeing, baking or broiling. The photo is of carrots in April morning sun which had been stored through the winter. Even though they were from storage and were large, they still excellent quality texture and flavor. We use it for our year round CSA shares. Grown by NB.  $\approx 18,000$  seeds/oz.

**[S]** \$4.00=1 g, sows 20 ft.,  $\approx 600$  seeds **[M]** \$12.00=3.5 g, 35 ft.,  $\approx 2000$  seeds

**CPS1 SALE COSMIC PURPLE Cert. BD/OG** Great purple carrots for spring planting with puple skin and yellow to orange flesh. This lot is on sale with larger amounts in the packet to compensate for the low germ which happened because the crop went through baseball sized hail, However, the seed which does germinate is fine. Sow early spring to mid-summer, full sun in rich, loose soil, 1/2 inch deep, 1 in. apart in rows 12 inch apart. Keep moist! Thin to 2 inches between plants.

**[S]** \$4.00=4 g **[M]** \$8.00=0.5 oz. **[XL]** \$20.00=2 oz.

**NEW! CTSP SATIVA PURPLE-SKIN-ORANGE INTERIOR Cert. OG** ONLY for Autumn harvest. DO NOT PLANT IN SPRING- because of its higher tendency to bolt if planted in the spring. SOW June July and in mild climates August for a late and sweet harvest. A two toned carrot bred by Sativa Biodynamic Seed Company in Switzerland that really brightens up a salad. It is very tasty both raw and cooked. Good healthy foliage.

**[S]** \$4.00=1 g,  $\approx 600$  seeds **[M]** \$10.00=3 g,  $\approx 1600$  seeds **[LG]** \$20.00=0.5 oz.,  $\approx 9000$  seeds

**CT6 SCARLET NANTES IMPROVED (seed movement scarlet nantes) Cert. BD/OG 75 days.** Uniform, medium-long, blunt-tipped roots. Sweet and juicy and keeps its quality through a long season. We get many repeat customers for these carrots at the farmer's market and its excellent storage makes it possible for us to include it in our year round CSA. Original source was a John Navazio selection. Grown by NB.  $\approx 18,000$  seeds/oz.

**[S]** \$4.00=1 g, sows 20 ft.,  $\approx 600$  seeds **[M]** \$9.00=3 g, 60 ft.,  $\approx 1600$  seeds **[LG]** \$18.00=0.5 oz., 300 ft.,  $\approx 8500$  seeds **[1 oz.]** \$29.00=600 ft.,  $\approx 18000$  seeds

## CAULIFLOWER *(Brassica oleracea)* $\approx 7,000$ seeds/oz.

**CF5 AMABILE Cert. OG** Going to try our best to grow this out at some point. Very early cauliflower with tightly crinkled, dark, grey-green leaves and low growing habit. Matures relatively uniformly and therefore has a short harvesting window. Forms healthy and heavy, very solid white heads. High percentage of grade 8 selections. Good resistance against graininess. Fine, delicate taste  $\approx 7,000$  seeds/oz.

**[S]** \$5.00 $\approx 20$  seeds **[M]** \$14.00=0.5 g,  $\approx 110$  seeds

**CF2 ODYSSEUS Cert. OG 70 days.** For early planting in the spring or possibly depending on your region's weather autumn planting. Give plenty of water and protection. Does need to fold the leaves over the head when it begins to develop. Does not naturally cover. Small to medium-sized heads with white curds when blanched: tie leaves over forming heads to protect from the sun. Sturdy, compact plants, not self blanching therefore KEEP an eye on them when they are ripening and help them cover their heads by breaking their outside leaves over the cauliflower head. For best results, start in greenhouse then transplant outside. Cultivation instructions: Sow indoors 4 weeks before set out in May or early June. Prick out at true leaf stage to 1" apart .TP outdoors 18" apart.  $\approx 7,000$  seeds/oz.

**[S]** \$4.00 $\approx 20$  seeds **[M]** \$9.00=0.25 g,  $\approx 60$  seeds **[LG]** \$19.00=1 g,  $\approx 240$  seeds **[XL]** \$55.00=2.5 g,  $\approx 600$  seeds

## CELERY & CELERIAC *(Apium graveolens)* $\approx 75,000$ seeds/oz.

**CE2 VENTURA CELERY Cert. BD/OG 52-100 days.** 28-30 in. tall glossy bright green plants with 12 in. stalks and well-developed heart. This variety has stood the test of time. Sow indoors about 12 weeks before transplanting, 6 seeds/in, 1/8" deep. Keep moist at 70-75 F. At true leaf stage, thin or prick out to 1-2" spacing. Set outside after danger of frost, 12" apart in rows 18" apart. Grown by RG.  $\approx 75,000$  seeds/oz.

**S** \$4.00=0.15 g, ≈200 seeds **M** \$8.00=0.5 g, ≈800 seeds **LG** \$22.00=2 g, ≈4000 seeds **XL** \$60.00=0.25 oz., ≈15000 seeds

**CE1 MONARCH CELERIAC** **Cert. BD/OG 100-150 days.** Productive scab resistant improved Giant Prague type matures fall to early winter. Large roots with firm white flesh. Celery root is a wonderful vegetable for the colder climates to have throughout the winter to add to soups, used like celery in stuffing, even grated for a Waldorf salad. It also makes a great cream of celery tasting soup without the fibers that would happen with stalk celery. Grown by NB. ≈50,000 seeds/oz.

**S** \$4.00=0.15 g, ≈200 seeds **M** \$6.00=0.5 g, ≈850 seeds **LG** \$11.50=2 g, ≈3000 seeds **XL** \$71.00=0.5 oz., ≈24000 seeds **1 oz.** \$136.00≈48000 seeds

## CONSULTATION

**CO4 AGRICULTURAL AND WHOLE FARM QUESTIONS** **Cert. **1 Other** \$0.00

## SWEET CORN (Zea mays) 100-150 seeds/oz.

**NEW! CS2 DAMAUN** **Cert. BD/OG 85-95 days.** Biodynamically bred open pollinated sugary enhanced early yellow sweet corn bred at the Swiss Biodynamic seed company in Switzerland! Delicious, very sweet and dependable open pollinated sweet corn which can hold its sweetness which is uncommon for open pollinated varieties of sweet corn. The seed lot which we grew out for MH in western Nebraska from Switzerland tested negative for gmo contamination. (MH tests all MH grown sweet corn varieties for gmo contamination and will not sell contaminated gmo seed.) Grown by NB.

**S** \$5.00=1 oz., ≈80 seeds **4+ oz.** \$4.50/ oz. bulk rate **5+ lb** \$50.00/ lb bulk rate≈12500 seeds

**CS1 HARMONY** **Cert. BD/OG 90 days.** A great, new cross from Wisconsin Biodynamic seed grower Steven Adams. Stalks between 7 and 8 feet depending on climate in which it is grown, often with multiple ears on a stalk, sweet good corn flavor with two toned colors of yellow and white. In warm, fertile soil, sow seeds 1 inch deep and 4 inches apart, in blocks of at least three rows spaced about 20 inches apart. Thin 8-12 inches apart. Grown by NB and SA.

**S** \$3.00=1 oz., sows 40 ft., ≈120 seeds **M** \$10.00=4 oz., 160 ft. **LG** \$30.00=1 lb

**NEW! CS5 ROSE POTPOURI** (rose potpourri sweet corn) **Cert. BD/OG 85 days.** Lovely open pollinated red sweet corn: What a surprise: 16 rows of kernels on full bodied 6-8 in. ears that range from rosy pink to deep burgundy as they mature. There is a small percentage of white, yellow and bicolor ears. Cook it as soon as you pick it or it also makes beautiful display ears as dried corn. Sow outdoors in spring after all danger of frost is past and soil has

warmed. Plant 1" deep, 3-4 seeds/ft. in rows 30" apart. Thin to 8"-12" apart in row. Plant in blocks of at least 4 rows to insure good pollination.

**S** \$3.00=0.5 oz. **M** \$10.00=4 oz. **LG** \$22.00=1 lb

## **POP CORN** (*Zea mays*) 250 seeds/oz.

**NEW! CN2 CHEROKEE RAINBOW** **Cert. BD/OG** HEIRLOOM from .Merlyn Niedens, combining several strains of long ear Cherokee popcorn sent to Southern Exposure Seed Exchange by Carl Barnes of Turpin, OK. Carl has helped save many of the Cherokee corns that came west over the Trail of Tears. This small kernelled variety makes surprisingly large pops, yielding for a low hull/ corn ratio. Great flavor. Highly ornamental, 5-7 in. ears have many shiny colors including red, blue, orange, white, and yellow with surprising variations. 6-8 ft. plants. We thank the First People's for the possibility to have corn.

**S** \$3.00=1 oz. **M** \$10.00=4 oz. **LG** \$15.00=1 lb **5+ lb** \$13.00/ lb bulk rate

## **CUCUMBERS** (*Cucumis sativus*) ~1060 seeds/oz.

**CU4 BONO** **Cert. BD/OG** Selection of cucumber from Switzerland. Large, dark green, smooth-skinned fruits that do not need trellising. Grown by NB. ~1,000 seeds/oz.

**S** \$3.00=1 g, sows 25 ft., ~30 seeds **M** \$7.00=4 g, 100 ft., ~120 seeds **LG** \$10.00=0.5 oz., 400 ft., ~420 seeds

**CU3 BOSTON PICKLER** **Cert. OG 55 days.** Heirloom from the 1800's still worthy today with long vines and good yields of stubby green fruit and very hardy even in wet years. Excellent texture and flavor in pickles. Field was sprayed with the Biodynamic preparations. Harvest small. Grown by JT. ~1,063 seeds/oz.

**S** \$3.00=1 g, ~40 seeds **M** \$6.00=0.25 oz., ~200 seeds **LG** \$9.00=1 oz., ~1000 seeds **2+ oz.** \$7.00/ oz. bulk rate **1 lb** \$64.00

**SALE! CU1 GREEN FINGER** **Cert. BD/OG** Bred by Cornell University, this cucumber goes a long ways toward smooth skin cucumbers in the field. Mild flavor. Skin is somewhat tough so good to ship. Very slender fruit. Disease Resistance: Powdery Mildew, Papaya Ring Spot Virus, Watermelon Mosaic Virus, Zucchini Yellow Mosaic Virus. Make sure to keep up with the harvest. Grown by NB. ~1,063 seeds/oz.

**S** \$3.00=1 g, ~35 seeds **M** \$7.00=0.25 oz., ~250 seeds **LG** \$15.00=1 oz., ~1000 seeds **4+ oz.** \$9.00/ oz. bulk rate

**CU6 MARKETMORE 86** **Cert. BD/OG 55-58 days.** Compact semi-bush type plants good for small gardens. 8-9 in. dark green fruits good for slicing or pickling. Very dependable production of non-bitter cucumbers from breeding by Dr Munger of Cornell University. One of Dr Munger's copious accomplishments! ~1,063 seeds/oz.

**S** \$3.00=1 g, ~30 seeds **M** \$9.00=0.5 oz., ~500 seeds

**CU2 SHINTOKIWA** **Cert. BD/OG 75 days.** Dark green 9-13 in. fruit. Outstanding crisp texture and mild delicious flavor. We never tire of eating these cucumber each day in the summer. Grow on a trellis to avoid crooked fruits. Perfect for salads, sushi, etc. Introduced to this country by Japanese students attending the Rudolf Steiner College and given to biodynamic seed grower, Harald Hoven who grew it for years under biodynamic culture. A winner at the farmer's markets and CSA customers love them! Grown by NB. ~1,063 seeds/oz.

**S** \$3.50=0.5 g, ~15 seeds **M** \$6.00=2 g, ~70 seeds **LG** \$17.00=15 g, ~500 seeds **XL** \$35.00=2 oz., ~2000 seeds **1 lb** \$170.00≈16000 seeds

**NEW! CU8 TANJA** **Cert. BD/OG** Longer cucumber 20-25 cm or 7-9 inch that does not need trellising. Non bitter, thick skin makes it good for shipping. From European breeding. Grown by NB. ~1,000 seeds/oz.

**S** \$3.00≈25 seeds **M** \$6.00=1 oz.

## **EGGPLANTS** (*Solanum melongena*) ~6,000 seeds/oz.

**NEW! EG2 DIAMOND Cert. BD/OG HEIRLOOM** Seed Savers Exchange acquired the seed of this eggplant variety from the Ukraine in 1993. Nine inch dark purple fruits which are on very vigorous early plants producing abundantly.  $\approx 6,000$  seeds/oz.

**[S]** \$3.00 $\approx$ 25 seeds **[M]** \$7.00=1 g,  $\approx$ 200 seeds **[LG]** \$20.00=4 g,  $\approx$ 800 seeds **[XL]** \$100.00=0.5 oz.,  $\approx$ 3000 seeds

**EG1 PING TUNG LONG Cert. BD/OG 65-75 days.** Prolific and early bearer of long thin purple fruits up to 12 in. long with tender skin that does not need to be peeled before cooking. Delicious barbecued or broiled. Named for its native town of Ping Tung, Taiwan. Selected for many years in California by Harald Hoven. Very prolific for us in Nebraska and a favorite at the farmer's market. Sow indoors at 80-90F 8 weeks before setting out. Thin or prick out 2"-3" apart. Set out after danger of frost 18" apart in rows 30" apart. Grown by NB.  $\approx 6,000$  seeds/oz.

**[S]** \$3.00=0.25 g,  $\approx$ 50 seeds **[M]** \$9.00=0.125 oz.,  $\approx$ 750 seeds

## EMPTY PACKETS FOR SEED SAVERS

**ENV ENVELOPE FOR SEED SAVING Ecologically Grown** Handy for seed saving trips or going to conferences where there is a seed swap, these small but servicable envelope with measurements of 4 3/16 inch by 2 11/16 inch, their flap is with the small extension to protect seed from falling out of the envelope.

**[S]** \$4.00 $\approx$ 12 Envelopes **[M]** \$7.00 $\approx$ 25 Envelopes

## ENDIVE/ CHICORY

**NEW! EN9 ETARDO BELGIAN ENDIVE Cert. BD/OG** Sow in the spring then lift roots in the fall, trim, replant in total darkness to grow the white chicons. Cold above with the bottom heat helps the chicons develop more solidly.

**[S]** \$5.00 $\approx$ 25 seeds

**SALE! EN1 TREFFINE MARAICHERE Cert. BD/OG 45 days.** This large frisee type endive is quite easy to grow and delightful in its delicate frilly appearance so lovely in salads. It can stand a frost so it is great to have some greens for those early spring markets. Best grown for spring or fall harvest. Needs to be planted in early spring before the late spring heat. Great for early spring or autumn greens mixes. Grown by RG.  $\approx 18,000$  seeds/oz.

**[S]** \$3.00 $\approx$ 100 seeds,  $\approx$ 100 seeds **[M]** \$6.00=0.125 oz.,  $\approx$ 2250 seeds **[LG]** \$12.00=0.5 oz.,  $\approx$ 9000 seeds

**NEW! zu1 ZUCKERHUT CHICORY (Sugar Hat) Cert. BD/OG 55-60 days.** A European type of hardy salad heads with thick leaves and a strong taste. Sow from mid-June to mid-July in order to harvest in the autumn and store into the winter time. Can be used with fruit or garlic to highlight its wonderful flavor. We do not usually find a way to get a bitter taste into our diet so zuckerhut can help those of us who feel we need bitter flavors to find this addition to our cuisine. Withstands a light frost down to 25 degrees F or -4 Centigrade.

**[S]** \$3.00 $\approx$ 20 seeds

## FARM CROPS

**FM9 BUCKWHEAT, MANCAN Cert. OG 30-55 days.** Soil must be around 55 degrees for good germination. Quick solution for summer cover. Sow late May through July. For a grain crop, sow 3 months before the autumn frost and harvest after the autumn frost. Grown by TVF.  $\approx 888$  seeds/oz.

**[S]** \$3.00=1 oz. **[M]** \$10.00=4 oz. **[LG]** \$15.00=1 lb

**NEW! CS2 DAMAUN Cert. BD/OG 85-95 days.** Biodynamically bred open pollinated sugary enhanced early yellow sweet corn bred at the Swiss Biodynamic seed company in Switzerland! Delicious, very sweet and dependable open pollinated sweet corn which can hold its sweetness which is uncommon for open pollinated varieties of sweet corn. Grown by NB.

**[S]** \$5.00=1 oz.,  $\approx$ 80 seeds **[4+ oz.]** \$4.50/ oz. bulk rate **[5+ lb]** \$50.00/ lb bulk rate $\approx$ 12500 seeds

**CNF FIELD CORN MANDAAMIN VARIOUS TYPES verified traditionally bred** BULK AMOUNTS OF TRADITIONALLY BRED FIELD CORN. CALL WALTER GOLDSTIEN who has been working on corn breeding for more than 40 years! The results of his work are quite profound! Consider consultation with the Mandaamin Institute

for the characteristics you need for field corn in your climate. Mandaamin supports your future with quality Corn and also Wheat 262-248-1533, email: wgoldstein@mandaamin.org Check out www.mandaamin.org

**1 Other** \$0.00

**FLP PHACELIA BEE FLOWER** (*Phacelia tanacetifolia*) **Cert. OG** Annual. The blue curled sprays of this little known flower are loved by the bees. Widely grown as a soil building cover crop on Biodynamic farms in Europe. Bushy plants Grown by BH and SAT.  $\approx 16,500$  seeds/oz.

**S** \$3.00=0.5 g,  $\approx 250$  seeds **M** \$5.00=7 g,  $\approx 3500$  seeds **LG** \$12.00=1 oz.,  $\approx 16000$  seeds **XL** \$50.00=8 oz.

**PU2 PUMPKIN, STYRIAN, NAKED-SEEDED** **Cert. BD/OG** 90-120 days. **HEIRLOOM** known from Styrian area in Austria where they are pressed for oil. Large, green/orange striped pumpkin grown for its seeds. Click on the photo to see inside the pumpkin. Seeds are delicious eaten raw or pressed for oil, or press for oil. Flesh can be used for soups but is also good for animals for animals. Extract the seeds from the pumpkins, rinse and dry seeds carefully; u on racks.  $\approx 135$  seeds/oz.

**S** \$3.00 $\approx 10$  seeds **4+ oz.** \$11.00/ oz. bulk rate

**FC8 SANFOIN** (*Onobrychis viciifolia*) **Cert. OG** Perennial, legume and therefore nitrogen fixing undemanding green manure plant for dry locations. Interesting as an insect pasture and for deworming sheep. Sensitive to waterlogging.

**S** \$3.00=1 g, sows 50 ft. **M** \$6.00=4 g, 200 ft. **LG** \$14.00=1 oz., 3000 ft. **2+ oz.** \$10.00/ oz. bulk rate

**NEW! FLS3 SUNFLOWER, PEREDOVIK** (*Helianthus annuus*) **Cert. BD/OG** 90-100 days. **HEIRLOOM** Oil seed type from Russia with small black seed on 4 to 6 inch heads selected to be single flowered plants but still a few with multiple heads Grown by NB.  $\approx 530$  seeds/oz.

**S** \$4.00=1 g, sows 7 ft.,  $\approx 15$  seeds **M** \$8.00=4 g, 30 ft.,  $\approx 75$  seeds **LG** \$20.00=16 g, 120 ft.,  $\approx 300$  seeds

**SF1 SUNFLOWER, TIENSVOLD** **Cert. OG** An oil sunflower offered by 30 year old Tiensvold farm black with a white stripe sometimes. Sow approximately 3 weeks after your last frost when soil is 60-70 degrees. They are fairly tolerant of warmth and dryness but water when they show first signs of wilting. Grown by TVF.

**S** \$3.00=1 oz. **M** \$10.00=4 oz. **LG** \$15.00=1 lb **5+ lb** \$12.00/ lb bulk rate

**NEW! FC4 TREFOIL, BIRDSFOOT** **Cert. OG** A legume with yellow flowers for fixing nitrogen which is low growing, great in pasture mixes with grass mixes especially bred for calcium soils It is equal to alfalfa intolerance to saline-alkaline soils and is adapted to soils of medium acidity. The best pH range for establishment is 6.0 to 6.5 though it tolerates a broader pH range of 5.5 to 7.5. Endures cold and drought. Go light on putting it in your mix until you find out how it performs in your climate and your soil. It is not welcome in these following states or at least needs attention for not getting out of hand: CA, IL, MN, MO, OR, TN, VA, WA, and WI. These prior mentioned states have somewhat wet climates and therefore it works well in drier climates for that reason.  $\approx 23,000$  seeds/oz.

**S** \$3.00=0.5 g,  $\approx 400$  seeds **M** \$6.00=2 g,  $\approx 1600$  seeds **LG** \$12.00=15 g,  $\approx 12000$  seeds **XL** \$20.00=2 oz.,  $\approx 45000$  seeds

**NEW! WHR WHEAT, TURKEY RED HEIRLOOM, HRWW** (*Triticum aestivum*) **Ecologically Grown** **Cert. BD/OG** 300 days. **HEIRLOOM**. **HRWW**=Hard red winter wheat. Turkey Red is the parent to many varieties of hard red winter wheat in the United States. This Turkey Red wheat seed has been grown in Kansas since the 1870s. Straw height can reach upwards of four feet in areas with 20-inches plus moisture. It is adaptable to wet, dry, hot and cold areas. It does require a hard freeze in the winter to develop grain to harvest the following summer. Ideal for bread, but it can be used as a general-purpose flour, ornamental or cover crop. For long time Demeter certified Biodynamic(R) farm: Stephens Land and Cattle in Kansas. sow them in well-drained soil at a depth of about 1 inch for spring wheat and 2 inches for winter wheat, spacing them evenly at around 20-25 seeds per square foot, ensuring they receive ample sunlight; ideally plant in late summer or early fall for an overwintered crop, and lightly rake the soil to cover the seeds after planting. Not recommended for spring planting unless your goal is for weed suppressions  $\approx 900$  seeds/oz.

**S** \$20.00=1 lb **M** \$30.00=10 lb **LG** \$43.00=20 lb

**FENNEL, BULBING** (*Foeniculum vulgare*)  $\approx 7,000$  seeds/oz.

**FE3 MONTEBIANCO** **Cert. BD/OG** 90-110 days. White, filled out bulgy stem especially for autumn. Direct seed outside in end June or early July to harvest beautiful bulbs.  $\approx 4,500$  seeds/oz.

**S** \$3.00=0.25 g, ~40 seeds **M** \$8.00=1 g, ~200 seeds **LG** \$12.00=4 g, ~700 seeds

**FE4 SELMA Cert. BD/OG** Selected from Zefo Fino, quick growing white bulbs with good bolt resistance. Grown by SAT. ~4,500 seeds/oz.

**S** \$3.00=0.5 g, ~90 seeds **M** \$10.00=2 g, ~360 seeds

**FE6 FINO Cert. OG 80 days.** Coming soon! A variety of Florence fennel producing an ellipse shaped bulb. It is particularly bolt resistant and therefore also suitable for early cultivation in the summer for harvest in the autumn unlike many varieties only suited for the autumn. 160 seeds per gram ~4,800 seeds/oz.

**S** \$3.00=0.25 g, ~30 seeds **M** \$12.00=2 g, ~300 seeds **LG** \$20.00=8 g, ~1200 seeds **XL** \$39.00=20 g, ~3200 seeds

## FLOWERS

**FL6 BACHELOR BUTTON, BLACK BALL Cert. BD/OG** These sweet looking bachelor button flowers does not deserve to be black balled. Flowers are lovely and distinctive in bouquets with they dark purple hue almost assuming black. Great for inectories as well as being attractive in a salad with their feathery purple. Direct sow in autumn for early spring flowers or early in the spring frost hardy! ~5,800 seeds/oz.

**S** \$3.00=2 g, ~400 seeds **M** \$15.00=8 g, ~1600 seeds

**NEW! H-BO BORAGE (Borago officinalis) Cert. BD/OG** Annual with star-shaped sky blue flowers that make striking salad garnish or fresh leaves used in tea. Attractive to bees. Grown by BH and SAT. ~1,500 seeds/oz.

**S** \$3.00=0.5 g, ~25 seeds **M** \$16.00=4 g, ~200 seeds **LG** \$25.00=10 g, ~500 seeds

**FM9 BUCKWHEAT, MANCAN Cert. OG 30-55 days.** Quick solution for summer cover. Sow late May through July. For a grain crop, sow 3 months before the autumn frost and harvest after the autumn frost. Sow outside when the soil is at 55 degrees, keep watered until the first germination. Wonderful flowering is great for many pollinators. Grown by TVF. ~888 seeds/oz.

**S** \$3.00=1 oz. **M** \$10.00=4 oz. **LG** \$15.00=1 lb

**NEW! FLC1 COREOPSIS ANNUAL ((Coreopsis tinctoria)) Cert. BD/OG** Annual of intense display of deep warm yellow-orange flowers throughout the summer on 20-24 inch tender stems. Nice simple cut flower with single pedals. Grown by SAT.

**S** \$3.00~25 seeds

**FLLR COSMOS, ORANGE, BRIGHT LIGHTS (Cosmos sulphureus) Cert. BD/OG 100-110 days.** Annual. Bushy 30 in. plants. Masses bright orange flowers start early and continue until killing frost. Grown by NB. ~3,500 seeds/oz.

**S** \$4.00=0.25 g

**NEW! FLC3 COSMOS, SENSATIONS MIX (C. bipinnatus) Cert. BD/OG 100-110 days.** Annual. Attractive 3-4 in. dark magenta, pink and white flowers on 4 ft. plants. Cut flower. Excellent habitat for beneficial insects.

**S** \$3.00~15 seeds

**FLE ECHINACEA PURPUREA (Purple Coneflower) Cert. BD/OG** Hardy Perennial. 36 in. tall plants bear large 4 in. daisy-type flowers with dark cone & lavender-pink petals. Strengthens immune system. Grown by NB. ~6,500 seeds/oz.

**S** \$4.00=0.5 g, ~40 seeds **M** \$10.00=2 g, ~160 seeds **LG** \$15.00=15 g, ~1200 seeds

**FL7 LOVE-IN-A-MIST (NIGELLA) (Nigella damascena) Cert. BD/OG** An old-fashioned flower from southern Europe variety sometimes called Fennel Flower because of its nutmeg-flavored seeds. Delicate feathery blue or white, sometimes a little bit of pink flowers on 8-12 inch stems., averaging 1 in. in diameter. . Cut flowers or dried seed pods can be used in dried flower arrangements. The tiny black seed is also known as false cumin which smells like grape koolaid! ~10,000 seeds/oz.

**S** \$3.00=1 g **M** \$6.00=4 g

**NEW! FL2 MORNING GLORY** (*Ipomoea tricolor*) **Cert. BD/OG** Annual. Mix of 4-5 in. blue and purple flowers on vines. Blooms from July until frost, open in early morning and closing after noon. Can make a small teepee shaped tripod for them to climb on, making it a fun place for children to play. Grown by NB.  $\approx 1,200$  seeds/oz.

**[S]** \$3.00=0.5 g,  $\approx 20$  seeds **[M]** \$8.00=2 g,  $\approx 75$  seeds **[LG]** \$14.00=8 g,  $\approx 300$  seeds

**FLP PHACELIA BEE FLOWER** (*Phacelia tanacetifolia*) **Cert. OG** Annual. Delicate blue curled sprays of this little known flower are loved by the honeybees. Widely grown as a soil building cover crop on Biodynamic farms in Europe. Bushy plants. Grown by BH and SAT.  $\approx 16,500$  seeds/oz.

**[S]** \$3.00=0.5 g,  $\approx 250$  seeds **[M]** \$5.00=7 g,  $\approx 3500$  seeds **[LG]** \$12.00=1 oz.,  $\approx 16000$  seeds **[XL]** \$50.00=8 oz.

**FL9 POPPY, HUNGARIAN PURPLE BREAD** **Cert. BD/OG** Beautiful bluish-purple flowers give way to attractive pods filled with poppyseed for baking. Pods can also be used in dried arrangements. Stake seed heads to prevent seed loss. Plant in late fall to very early spring.  $\approx 95,000$  seeds/oz.

**[S]** \$3.00=0.125 g,  $\approx 250$  seeds **[M]** \$8.00=0.5 g,  $\approx 1000$  seeds

**FLPOP POPPY, RED COMMON (PAPAVER RHOEAS)** ((*Papaver rhoeas*)) **Cert. OG** Annual, *Papaver Rhoeas* but with autumn sowing also two-year summer flowers with large, bright red flowers. Becomes about 50-60 cm high or around 19-23 inches high when in bloom. Cut buds for the vase for best holding of blooms.  $\approx 100,000$  seeds/oz.

**[S]** \$3.00 $\approx 50$  seeds **[XL]** \$15.00=0.25 g,  $\approx 800$  seeds

**NEW! FLA5 RED SPIKE AMARANTH** (*Amaranthus cruentus*) **Cert. BD/OG 65-75 days.** Graceful red flower heads for late summer and autumn flower arrangements and just plain stunning in the garden! When our friend in the photo visited in Sept the the flower heads of the Red Spike were a foot or 2 taller than she is. Tiny seeds and giant plants. When the plants are young the leaves can also be eaten in salads or stir fries. 1400 seeds to a gram Grown by NB.  $\approx 40,600$  seeds/oz.

**[S]** \$5.00=0.1 g,  $\approx 100$  seeds **[M]** \$11.00=0.5 g,  $\approx 700$  seeds **[LG]** \$20.00=2 g,  $\approx 2800$  seeds

**FC8 SANFOIN** (*Onobrychis viciifolia*) **Cert. OG** Perennial, legume and therefore nitrogen fixing undemanding green manure plant for dry locations. Interesting as an insect pasture and for deworming sheep. Sensitive to waterlogging. A beautiful flower!!!

**[S]** \$3.00=1 g, sows 50 ft. **[M]** \$6.00=4 g, 200 ft. **[LG]** \$14.00=1 oz., 3000 ft. **[2+ oz.]** \$10.00/ oz. bulk rate

**FLSN SNAPDRAGON PANORAMA MIX** (*Antirrhinum majus*) **Cert. BD/OG** Annual. 18-24in. plants with bright spikes of yellow, red, purple, maroon and white flowers. Takes long time to germinate and needs to be planted on surface of soil with protection from drying out such as a piece of smooth paper or cloth keeping it damp. Mist the seed so it does not get displaced. Can also be rooted from mature plants and will sow itself sometimes if there is enough moisture. Very hardy flower but still considered an annual. Grown by NB.

**[S]** \$3.00 $\approx 100$  seeds

**NEW! FLS2 SUNFLOWER, ABENDSONNE (EVENING SUN)** (*Helianthus annuus*) **Cert. BD/OG** Annual. Lovely multiple headed sunflower with rich dark centers and golden yellow periphery. Sow approximately 3 weeks after your last frost when soil is 60-70 degrees. They are fairly tolerant of warmth and dryness but water when they show first signs of wilting.  $\approx 650$  seeds/oz.

**[S]** \$3.00=0.5 g,  $\approx 10$  seeds **[M]** \$6.00=2 g,  $\approx 40$  seeds **[LG]** \$15.00=10 g,  $\approx 200$  seeds

**NEW! FLS3 SUNFLOWER, PEREDOVIK** (*Helianthus annuus*) **Cert. BD/OG 90-100 days.** HEIRLOOM Oil seed type from Russia with small black seed on 4 to 6 inch heads selected to be single flowered plants but still a few with multiple heads. Grown by NB.  $\approx 530$  seeds/oz.

**[S]** \$4.00=1 g, sows 7 ft.,  $\approx 15$  seeds **[M]** \$8.00=4 g, 30 ft.,  $\approx 75$  seeds **[LG]** \$20.00=16 g, 120 ft.,  $\approx 300$  seeds

**SF1 SUNFLOWER, TIENSVOLD** **Cert. OG** An oil sunflower seed offered by 30 year old Tiensvold farm which is black with a white stripe sometimes. Sow approximately 3 weeks after your last frost when soil is 60-70 degrees. They are fairly tolerant of warmth and dryness but water when they show first signs of wilting. Grown by TVF.

**[S]** \$3.00=1 oz. **[M]** \$10.00=4 oz. **[LG]** \$15.00=1 lb **[5+ lb]** \$12.00/ lb bulk rate

**FLD1 TITHONIA, MEXICAN SUNFLOWER** (*Tithonia rotundifolia*) **Cert. BD/OG 85-90 days.** Stunningly showy beautiful large 4 ft annual with 3 in. bright orange daisy-like flowers from mid-summer until frost. Needs warmth to germinate. Nice cut flower. Sensitive to cold. Sow in greenhouse 6-8 weeks before transplanting outside. Large plants, give a 4 foot to 6 foot space.  $\approx 2,800$  seeds/oz.

**S** \$3.00≈10 seeds **M** \$7.00=0.5 g, ≈45 seeds

**NEW! HTO TOBACCO, NICOTIANA TOBACUM (NICOTIANA, TOBACUM) Cert. BD/OG** need to be started inside just like tomatoes. Impressive for a flowering border because it grows to over 6 feet tall.

**S** \$3.00≈100 seeds **M** \$12.00=0.1 g, ≈700 seeds **LG** \$25.00=1 g, ≈7000 seeds

**NEW! FL3 ZINNIA, SCARLET Cert. BD/OG** Medium large scarlet red flowers with yellow and brown middles. Really a stand out in bouquets at the market. Grown by NB.

**S** \$3.00=0.25 g, ≈20 seeds **M** \$10.00=1 g, ≈80 seeds

## GARLIC

**SALE! GE7 DAINTY SIZED CHESNOK RED Cert. BD/OG** CHESNOK: easy to peel cloves per purple striped bulb having approximately 12 or more modest SMALL SIZED BULBS. This is not our select Chesnok which is sold out, but great size for the kitchen. Also delicious baked. **SELECTED HEIRLOOM:** Sources say it originated from the village of Shvelisi, Republic of Georgia. Good for baking. Hardneck type. MH tests regularly for garlic nematodes. **GROWING INFORMATION:** GARLIC IS PLANTED from OCT through November. Cloves are the seeds for the garlic and are planted 6-8 inches apart in rows around 12 inches apart. Grows through the winter and harvested around the following July depending on where you are located, here in zone 4, we usually harvest hard neck garlic in the second and third week of July. ORDER NOW for shipping: SEPT through DEC 2024

**S** \$12.00=1 lb **M** \$55.00=5 lb **LG** \$120.00=15 lb

**SALE! GE2 MEDIUM-SIZED MUSIC Cert. BD/OG** MEDIUM- SIZED MUSIC IS HARDNECK PORCELAIN for cooking and planting garlic: **HEIRLOOM:** Beautiful, easy to peel and a vigorous grower with usually an average 4-6 cloves with good flavor. Medium sized is NOT MH select music (you can see that below) which we are almost out of but medium size ie 1.80 inch bulb or smaller and is great size for cooking because the cloves are more reasonable sized for garlic presses and can be planted in gardens where you are not needing to have a giant size and select seed. Very easy to grow and a hardy type for severe winters. Our Music Aria garlic strain started with Al Music who brought it back from his homeland in Italy to Canada, and MH strain was further selected by Danielle LaBerge in Quebec, then passed on to Jean-David Derramaux who began the Healing Plant Gardens at Camphill Village USA in upstate New York in the 1990's. Now it has transferred itself to Nebraska and has done very well here. Great flavor! It is truly outstanding in every way. For best results of nicely formed garlic bulbs, plant in autumn best is in Oct. Stores well into early spring. MH tests each year for garlic nematodes. **GROWING INFORMATION:** GARLIC IS PLANTED from OCT through November. Cloves are the seeds for the garlic and are planted 6-8 inches apart in rows around 12 inches apart. Grows through the winter and harvested around the following July depending on where you are located, here in zone 4, we usually harvest hard neck garlic in the second and third week of July. ORDER NOW for shipping: SEPT through DEC 2024.

**S** \$12.00=1 lb **M** \$55.00=5 lb **LG** \$135.00=15 lb

**NEW! SALE! GA4 SELECT SEED: INCHELLIUM, DIXON HARDY SOFT NECK Cert. BD/OG** DIXON HARDY SOFT NECK, **SELECTED HEIRLOOM** from Montana, extraordinary storage capability! Artichoke type selected over several decades by the Batey's organic farm in Montana : a very hardy SOFTNECK! Its origin can be traced to red inchellium with one other artichoke variety in the mix. Red Inchellium was found on the Coleville Reservation in eastern Washington. 2024 there are about 8 bulbs per lb. Cloves vary in size. This is an artichoke type which has a layer of small inner cloves and a layer of larger cloves. In general the cloves are larger than many of the other softneck varieties, easier to peel than our other softneck varieties. And here in western Nebraska, zone 4-5, we harvest soft neck garlic around the 1st week in July. Plantable Inchellium cloves in a bulb: 8 -16 cloves. Softneck garlics are the types of garlic for braiding. General garlic planting and growing **INFORMATION:** We sow in October about 6-8 inches apart in the row in our zone 4-5 climate of western Nebraska. Grows through the winter and then is harvested around the following July depending on where you are located. Softnecks such as Dixon are usually ready to harvest before hardnecks For best results of nicely formed garlic bulbs, plant in autumn. MH tests regularly for garlic nematodes. ORDER NOW for shipping: SEPT through DEC 2024.

**S** \$17.00≈3 bulbs, sows 15 ft. **M** \$22.00=1 lb, 40 ft. **LG** \$63.00=3 lb **XL** \$175.00=10 lb

**GA2 SELECT SEED: MUSIC ARIA Cert. BD/OG** MUSIC IS HARDNECK PORCELAIN garlic: **SELECTED HEIRLOOM:** Beautiful, easy to peel and a vigorous grower with usually an average 4-7 large cloves with good flavor. We have selected toward averaging 5 cloves. 2024 there are approximately bulbs per pound so about 15 feet of sowing per pound. With every bulb you get at least 4 cloves. Very easy to grow and a hardy type for severe winters. Our Music Aria garlic strain started with Al Music who brought it back from his homeland in Italy to Canada, and MH

strain was further selected by Danielle LaBerge in Quebec, then passed on to Jean-David Derramaux who began the Healing Plant Gardens at Camphill Village USA in upstate New York in the 1990's. Now it has transferred itself to Nebraska and has done very well here. This garlic grows bigger than any garlic we have ever grown, yet maintains its great flavor! It is truly outstanding in every way. For best results of nicely formed garlic bulbs, plant in autumn. MH tests each year for garlic nematodes. GROWING INFORMATION: GARLIC IS PLANTED from OCT through November. Cloves are the seeds for the garlic and are planted 6-8 inches apart in rows around 12 inches apart. Grows through the winter and harvested around the following July depending on where you are located, here in zone 4, we usually harvest hard neck garlic in the second and third week of July. PREORDER 2024: garlic seed for autumn planting 2024 when our 2024 July HARVEST is FINISHED. ORDER NOW for shipping: SEPT through DEC 2024. Grown by NB.

**[S]** \$17.00≈3 bulbs, sows 6 ft. **[M]** \$25.00=1 lb, 17 ft. **[LG]** \$63.00=3 lb **[XL]** \$190.00=10 lb **[25 lb]** \$375.00

**GA3 CALIFORNIA EARLY-NEBRASKA SELECT** **Cert. BD/OG** California EARLY NEBRASKA SELECT IS SOFT NECK TYPE. Softneck garlics are the types of garlic for braiding. Harder to peel than hardneck types but stores better than hardnecks. Our strain stores until late spring of the following year after July harvest when stored in cool, dry conditions. In 2024 there are about 9 bulbs per lb. They are an artichoke formation of cloves and often have approximately around 10-12 smallish cloves so there are more plants possible per bulb than the hardneck varieties. Soft necks are best for milder winters but our strain has been selected to survive our cold, dry winters in western Nebraska. Another advantage to softneck garlics besides their long storage is that they can be braided. GROWING INFORMATION: GARLIC IS PLANTED from OCT through November. Cloves are the seeds for the garlic and are planted 6-8 inches apart in rows around 12 inches apart. Grows through the winter and harvested around the following July depending on where you are located, here in zone 4, we usually harvest hard neck garlic in the second and third week of July. PREORDER 2024: garlic seed for autumn planting 2024 when our 2024 July HARVEST is FINISHED. ORDER NOW for shipping: SEPT through DEC 2024 Grown by NB.

**[S]** \$15.00≈3 bulbs, sows 15 ft. **[M]** \$25.00=1 lb, 40 ft. **[LG]** \$67.00=3 lb, 120 ft.

**GA7 RED CHESNOK, PURPLE STRIPE TYPE HARDNECK** **Cert. BD/OG** CHESNOK: easy to peel cloves per purple striped bulb having approximately 10 modest sized cloves per bulb. Also delicious baked. **SELECTED HEIRLOOM:** Sources say it originated from the village of Shvelisi, Republic of Georgia. Good for baking. Hardneck type. MH tests regularly for garlic nematodes. GROWING INFORMATION: GARLIC IS PLANTED from OCT through November. Cloves are the seeds for the garlic and are planted 6-8 inches apart in rows around 12 inches apart. **[S] \$4.00=0.5 g, ≈150 seeds [M] \$10.00=2 g, ≈600 seeds**

**GR5 PAC CHOI, PRIZE (Brassica rapa) Cert. BD/OG 50 days.** Heavy upright vase-shaped rosettes of tender dark-green spoon-shaped leaves on thick solid-white stems. Grown by NB. *≈12,500 seeds/oz.*

**[S] \$3.00=1 g, ≈440 seeds [M] \$8.00=4 g, ≈1500 seeds [LG] \$15.00=0.5 oz., ≈6000 seeds [XL] \$27.00=2 oz., ≈5000 seeds**

**GR9 WASABINO MUSTARD (Brassica rapa var. japonica) Cert. BD/OG** This delicious delicate mustard type can spice up a salad well or go into a stir fry. Fine notched, light green leaves. The spicy, slightly spicy taste is reminiscent of horseradish and gives salads a fresh note. Cold resistant. Harvest baby leaf after 3 weeks. It also can be grown to form bunches somewhat like a kale bunch. Has a taste like wasabi but not as hot. Very hardy! Early spring or late summer sow outside 10 seeds/ft. 1/2in deep in rows 12-18in. apart. Stands frost, bolts in heat. *≈10,000 seeds/oz.*

**[S] \$4.00=0.25 g, ≈70 seeds [M] \$8.00=1 g, ≈250 seeds [LG] \$15.00=4 g, ≈1000 seeds [XL] \$25.00=1 oz., ≈10000 seeds**

**GRA1 YUKINA SAVOY (brassica rapa) Cert. BD/OG** This deep green colored rich full flavor Asian green is delicious in spring and the autumn. Will bolt in the summer. Gives a satisfying boost in nutrition eaten raw or sauteed. *≈12,500 seeds/oz.*

**[S] \$3.00=0.5 g, sows 10 ft., ≈200 seeds [M] \$5.00=2 g, 40 ft., ≈800 seeds [LG] \$12.00=15 g, 600 ft., ≈6000 seeds [XL] \$25.00=2 oz., 2400 ft., ≈24000 seeds**

## GREENS, SPECIALTY

**GR8 AMARA KARATE GREENS (brassica carinata) Cert. BD/OG 50-65 days.** Greens A buttery textured green grown in the cool of autumn or spring, kale like mustard with smooth texture when cooked, steamed, stir fried and great addition to salads or by itself raw or try it in smoothies. Somewhat like narrow leaf collards but a different species. And it is best planted in early spring or for late summer for autumn harvest depending on how long your autumns are. Rich in vitamin C and folic acid. Grown out by Harald Hoven in California. Also Known as Ethiopian Kale or Abyssinian mustard. For seed buffs from Wikipedia: brassica carinata is thought to result from an ancestral hybridisation event between Brassica nigra (genome composition BB) and Brassica oleracea (genome composition CC). Considered to be in development for an oil seed crop. *≈5,000 seeds/oz.*

**[S] \$3.00=1 g, ≈500 seeds [M] \$5.00=4 g, ≈2000 seeds [LG] \$10.00=1 oz., ≈5000 seeds [XL] \$30.00=4 oz., ≈20000 seeds**

**GR2 ARUGULA (Eruca vesicaria) Cert. BD/OG 40 days.** 20 days for cutting, 40 days to full size. Pungent salad green with dark green leaves with a nutty radish flavor. Grown by RG. *≈15,000 seeds/oz.*

**[S] \$3.00=0.5 g, ≈250 seeds [M] \$6.00=0.125 oz., ≈1800 seeds**

**NEW! GRRT BRISEBOIS'S RAINBOW TATSOI Cert. BD/OG** From Dan Brisebois of Tourne De Sol a tatsoi which has green leaves and various hues of purple and pink on the stems. Quite hardy, beautiful and delicious. Check out his story of breeding it. <https://goingtoseed.wordpress.com/2019/02/07/how-i-bred-rainbow-tatsoi/> *≈12,000 seeds/oz.*

**[S] \$3.00=0.5 g, ≈200 seeds [M] \$9.00=2 g, ≈800 seeds [LG] \$48.00=15 g, ≈3000 seeds**

**COS1 BUTTERFLAY** Cert. OG or **DS1 BUTTERFLAY** Cert. BD/OG 45 days. Vigorous early spinach with medium dark-green savoyed leaves and a full rich flavor. Quick-growing and late-bolting. ≈2,150 seeds/oz.

**Catalog # COS1**, Grown by BH and SAT:

**[S]** \$4.00=4 g, sows 30 ft., ≈300 seeds **[M]** \$7.00=1 oz., 200 ft., ≈2000 seeds **[LG]** \$20.00=4 oz., 800 ft., ≈8000 seeds **[1 lb]** \$45.00=3200 ft., ≈128000 seeds

**Catalog # DS1**, Grown by BH and SAT:

**GR9 WASABINO MUSTARD** (*Brassica rapa var. japonica*) Cert. BD/OG This delicate mustard type can spice up a salad well. Fine notched, light green leaves. The spicy, slightly spicy taste is reminiscent of horseradish and gives salads a fresh note. Cold resistant. Harvest baby leaf after 3 weeks.  $\approx 10,000$  seeds/oz.

**[S]** \$4.00=0.25 g,  $\approx 70$  seeds **[M]** \$8.00=1 g,  $\approx 250$  seeds **[LG]** \$15.00=4 g,  $\approx 1000$  seeds **[XL]** \$25.00=1 oz.,  $\approx 10000$  seeds

**NEW! zu1 ZUCKERHUT CHICORY** (*Sugar Hat*) Cert. BD/OG 55-60 days. A European type of hardy salad with an elongated, tall tapered heads covering lots of yellow-white heart leaves. Sow from mid-June to mid-July in order to harvest in the autumn and store into the winter time. Can be used with fruit or garlic to highlight its wonderful flavor. We do not usually find a way to get a bitter taste into our diet so zuckerhut can help those of us who feel we need bitter flavors to find this addition to our cuisine. Withstands a light frost.

**[S]** \$3.00 $\approx 20$  seeds

## HERBS

**H-B BASIL** (*Ocimum basilicum*) Cert. BD/OG Good strain of regular basil, genovese type from the German Biodynamic seed company with great germination rate. Annual. 18 in. plants give continuous cuttings from mid-summer until frost if flower stalks are pinched off. Grown by BH and SAT.  $\approx 18,000$  seeds/oz.

**[S]** \$4.00=0.1 g,  $\approx 50$  seeds **[M]** \$7.00=1 g,  $\approx 500$  seeds **[LG]** \$18.00=3 g,  $\approx 1500$  seeds

**NEW! H-BO BORAGE** (*Borago officinalis*) Cert. BD/OG Annual with star-shaped sky blue flowers that make striking salad garnish or fresh leaves used in tea. Attractive to bees. Grown by BH and SAT.  $\approx 1,500$  seeds/oz.

**[S]** \$3.00=0.5 g,  $\approx 25$  seeds **[M]** \$16.00=4 g,  $\approx 200$  seeds **[LG]** \$25.00=10 g,  $\approx 500$  seeds

**NEW! H-CH CHAMOMILE, GERMAN** (*Matricaria recutita*) Cert. BD/OG Biodynamic preparation annual. 18 in tall with small white petals and golden centered flowers used as a relaxing tea for stomach and intestinal problems. Grown by NB.  $\approx 300,000$  seeds/oz.

**S** \$3.00=0.1 g, ~200 seeds **M** \$12.00=0.25 g, ~2400 seeds

**H-CI CILANTRO AND CORIANDER** (*Coriandrum sativum*) Cert. BD/OG Annual. Young leaves are for fresh salads, salsa & other Mexican cuisine. 18 in. stalks bear white flowers which become spicy seeds in late summer which are delicious in bread, cookies and even quite refreshing in homemade ice cream. Grown by NB and RG. ~2,200 seeds/oz.

**S** \$3.00=1 g, ~50 seeds **M** \$7.00=0.5 oz., ~1000 seeds

**FLE ECHINACEA PURPUREA** (Purple Coneflower) Cert. BD/OG Hardy Perennial. 36 in. tall plants bear large 4 in. daisy-type flowers with dark cone & lavender-pink petals. Strengthens immune system. Grown by NB. ~6,500 seeds/oz.

**S** \$4.00=0.5 g, ~40 seeds **M** \$10.00=2 g, ~160 seeds **LG** \$15.00=15 g, ~1200 seeds

**H-GO GREEK OREGANO** Cert. BD/OG GREEK TYPE Low growing heat loving herb for pizzas and other types of mediterranean cuisine. In northern climates, best success is to sow inside and plant out after the last frost in spring. Grown by BH.

**S** \$3.00~100 seeds

**NEW! H-LAV LAVENDER** (*Lavendula officinalis*) Cert. BD/OG Perennial. Bushy plants with fragrant violet-blue flowers. A soothing herb used in dried fragrance, bath mix and as a tea for nerves, insomnia and headaches. For best success: try soaking the seeds for 24 hours, drain and then sow in green house. Grown by SAT. ~26,000 seeds/oz.

**S** \$4.00~25 seeds **M** \$14.00=0.25 g, ~200 seeds

**H-N NETTLE, STINGING** (*Urtica dioica*) Cert. BD/OG Perennial. 4-5 ft. plants. Fine prickly silica tipped hairs on leaves and stems release formic acid as a skin irritant when touched. Biodynamic preparation plant. Wonderful to eat steamed in the spring. Good tonic also for animals. Grown by NB and SAT.

**S** \$5.00~50 seeds, ~50 seeds

**HB-SA SAGE** (*Salvia officinalis*) Cert. OG 24-30 in. semi-shrubby plants with oblong white wooly leaves and violet blue flower spikes. Savory herb used with meat, medicinally as an astringent. It is delicious and an essential ingredient to sausage types of dishes. This is in the Labiatae family from the Mediterranean and sometimes referred to as English sage, NOT to be confused with the native so called sage in the arid west which is in the artimesia family. Cold climates, sow in @ 65-70 F few wk prior last frost. Keep moisture even! Not too wet or dry, transplant out after last frost. Warm climates sow out when soil is 70 F Grown by SAT. ~3,400 seeds/oz.

**S** \$3.00~15 seeds **M** \$9.00=0.5 g, ~50 seeds

**H-TH THYME** (*Thymus vulgaris*) Cert. BD/OG Perennial Small 6-12 in. bushy plants with an abundance of small leaves. Warming culinary herb. Grown by SAT. ~142,000 seeds/oz.

**S** \$3.00~50 seeds **M** \$19.00=0.125 g, ~600 seeds

**NEW! HTO TOBACCO, NICOTIANA TOBACUM** (*NICOTIANA, TOBACUM*) Cert. BD/OG Can grow in zone 3 and above but would need to be started inside just like tomatoes. Impressive for a flowering border because it grows to over 6 feet tall. Even this year when it was beaten back by golf ball size hail at our farm it rebounded to over 6 feet!

**S** \$3.00~100 seeds **M** \$12.00=0.1 g, ~700 seeds **LG** \$25.00=1 g, ~7000 seeds

**H-TU TULSI OR HOLY BASIL** (*Ocimum Sanctum*) Cert. BD/OG Type of basil from India, can be used include culinary and tea having possible healing qualities. Tulsi, in Hindi means "the incomparable one." Possible medicine is made from all parts of the plant to help with stress. Can be prepared as a tea or used culinarily in stir fries or soups. Has somewhat spicy taste. ~45,000 seeds/oz.

**S** \$3.00~100 seeds **M** \$7.00=0.5 g, ~750 seeds **LG** \$13.00=2 g, ~6000 seeds

**NEW! H-YA YARROW** (*Achillea millefolium*) Cert. BD/OG Hardy drought resistant 2-3 ft. perennial with flat clusters of white flowers used in tea for colds and fevers and as herb in Biodynamic compost. Sow 6 weeks before planting out. Small seeds should be only lightly covered with soil. Grown by NB. ~200,000 seeds/oz.

**S** \$3.00~100 seeds **M** \$12.00=0.25 g, ~1000 seeds

**KALE & COLLARDS**

(*Brassica oleracea*) ~7,000 seeds/oz.

**GR8 AMARA KARATE GREENS** (*brassica carinata*) **Cert. BD/OG 50-65 days.** GreensA buttery textured green grown in the cool of autumn or spring, kale like mustard with smooth texture when cooked, steamed, sti fried and great addition to salads. Rich in vitamin C and folic acid.Grown out by Harald Hoven in California. Also Known as Ethiopian Kale or Abyssinian mustard. Fpr seed buffs from Wikipedia: brassica carinata is thought to result from an ancestral hybridisation event between Brassica nigra (genome composition BB) and Brassica oleracea (genome composition CC). Considered to be in development for an oil seed crop. *≈5,000 seeds/oz.*

**[S]** \$3.00=1 g, ≈500 seeds **[M]** \$5.00=4 g, ≈2000 seeds **[LG]** \$10.00=1 oz., ≈5000 seeds **[XL]** \$30.00=4 oz., ≈20000 seeds

**KA5 Roter Krauser (Crinkly Red)** (*Brassica oleracea var. sabellica*) **Cert. OG** aka Red Cross or Crinkly Red or Curly Roja **HEIRLOOM from Switzerland** . Thick reddish/purple pinnate leaves for spring sowing. They grow slowly but are really colorful. Hot water treated seed. *≈7,000 seeds/oz.*

**[S]** \$3.00=0.25 g, ≈50 seeds **[M]** \$9.00=1 g, ≈230 seeds

## **COLLARDS** (*Brassica oleracea*) ~7,000 seeds/oz.

**NEW! COL2 GREEN GLAZE** **Cert. OG** Ira Wallace from Southern Exposue Seed Exchange together with others has reenergized the interest in collard greens. Green Glaze was made available through their community work and is one of the oldest heirloom collards in the US. Green Glaze has mostly shiny leaves and a mild taste cooked or raw. Start inside where winters are harsh. Mild winter, plant out 4-5 weeks prior to last frost. (That means you sow inside about 6 weeks before that transplant.) Grown by SE.

**[S]** \$4.00=0.1 g, ≈20 seeds **[M]** \$8.00=0.5 g, ≈100 seeds

## **KALE** ~7,000 seeds/oz.

**KL3 LACINATO KALE** **Cert. BD/OG 62 days.** Blue-green lance-shaped leaves. Traditional Italian variety used for Minestrone Soup. Good for bunching. Grown by CA and TT.

**[S]** \$3.00=0.5 g, ≈100 seeds **[M]** \$8.00=2 g, ≈400 seeds

**KA4 LARK'S TONGUE (AKA LERCHENZUNGEN)** (**LARK'S TOUNGUE, Meadowlark kale**) **Cert. BD/OG** Good frost hardy variety according to Biodynamic growers in Northern Germany. Finely curled narrow, slightly drooping leaves with good flavor. Cultivation instructions: Sow inside for early spring crop or fro early summer; set out 10-12 wks before frost. For Fall kale: direct seed late June, 2" apart, thin to 8". Good kale to grow outside as it does not show the stress of the cabbage worms as much as lacinato. Grown by BH.

**[S]** \$3.00=0.5 g, ≈100 seeds **[M]** \$8.00=2 g, ≈400 seeds **[LG]** \$20.00=8 g, ≈1600 seeds **[XL]** \$30.00=15 g, ≈3000 seeds

## **KOHLRABI** (*Brassica oleracea*) ~6,500 seeds/oz.

**NEW! KR3 AZURE STAR** **Cert. BD/OG 58 days.** Early bulbs with a deep bluish-purple hue. Smooth crisp sweet white interior. Sometimes it cracks in the field. Grown by BH. *≈6,500 seeds/oz.*

**[S]** \$4.00≈25 seeds **[M]** \$10.00=0.5 g, ≈100 seeds

**NEW! KR5 ENRICO EARLY** **Cert. BD/OG** For early spring kohlrabi plantings or once again in late summer for late autumn harvests. Absolutely deliciously crunchy and refreshing. White, flat, round variety with medium foliage. Develops quickly and is suitable for all growing periods EXCEPT midsummer. Slight tendency to burst and violet discoloration. From Sativa Biodynamic Swiss Company's breeding. All our varieties are open pollinated! Hot water treated. Sow indoors 4-6 weeks before setting out, 3-4 per inch, " deep. At true leaf stage prick out to 1" spacing. Set out after danger of hard frost or if before the last frost protect. *≈6,500 seeds/oz.*

**[S]** \$4.00≈25 seeds, ≈25 seeds **[M]** \$11.00=0.5 g, ≈100 seeds **[LG]** \$29.00=2 g, ≈400 seeds

**SHIPPING INCLUDED IN BULK PRICE**

**KR1 LANRO** **Cert. BD/OG 56 days.** The most wonderfully adaptive we know of, with a delicious flavor, texture and NEVER woody. Reliable early 7-10 oz. green Kohlrabi with tender white flesh For spring or fall harvest and with a transplanting in August in Nebraska, can be stored into the winter! Ready in 8 weeks from setting out. Sow indoors 4-6 weeks before setting out, 3-4 per inch, " deep, At true leaf stage prick out to 1" spacing between plants. Set out

after danger of hard frost. Sow every 10-14 days for a continuous supply. Also can be sown in August through September and stored to provide kohlrabi in early winter. Grown by NB. *≈7,000 seeds/oz.*

**S** \$3.00≈25 seeds, ≈25 seeds **M** \$11.00=0.5 g, ≈100 seeds **LG** \$25.00=2 g, ≈400 seeds

**NEW! SALE! KR4 RASKO** **Cert. BD/OG** Close to year-round outdoor cultivation as well as early under glass. Slightly elongated, well placed, round stem with strong leaves. Semi erected leaves. Early to medium early maturing. Good uniform growth. Rich flavour, aromatic with a good amount of sweetness. A firm consistency without tending to woodiness. Grown by BH. *≈6,500 seeds/oz.*

**S** \$3.00≈20 seeds, ≈20 seeds **M** \$8.00=0.5 g, ≈100 seeds **LG** \$20.00=2 g, ≈400 seeds

## LEEKS

(*Allium porrum*) ~10,000 seeds/oz.

**LK2 BLEU DE SOLAIZE** **Cert. BD/OG** SEED HEIRLOOM from . France dating back to the 19th century. Overwintering medium long shanks with a blue green tinge after the winter. We liked this leek and it did well in our outrageous 2012 summer even with temperatures soaring to 105 degrees. Then we had temps of -20 F stored in our unheated greenhouse. Cultivation directions: Sow inside 8-10 weeks before setting out, 1" apart and " deep. Transplant outdoors in late spring when pencil thick 6" apart, in rows 24" apart. Hill plants with soil 2 or 3 times during season. Grown by NB. *≈10,000 seeds/oz.*

**S** \$4.00=0.5 g, sows 20 ft., ≈150 seeds **M** \$8.00=3 g, 80 ft., ≈600 seeds **LG** \$12.00=0.25 oz., 300 ft., ≈2400 seeds

**LK3 HALDOR** **Cert. BD/OG** Good flavor!! Hardy variety going into the edge of winter with longer stem with a larger proportion of white; dark, bluegreen and upright leaf placement. Only a slight tendency to form bulbs. Limited frost resistance. Can be harvested from October to December as well as overwintered in refrigeration.. Grown by BH and NB. *≈10,000 seeds/oz.*

**S** \$3.00=0.3 g, sows 15 ft., ≈100 seeds **M** \$7.00=1 g, 45 ft., ≈350 seeds **LG** \$15.00=4 g, 160 ft., ≈1200 seeds

**LK1 KING RICHARD** **Cert. BD/OG** 75 days. SEED of fast-growing summer leek. The thick white shafts can reach 12 in. in length. Light-green upright leaves, mild flavor. Sow inside 8-10 weeks before setting out, 1" apart and " deep. Transplant outdoors in late spring when pencil thick 6" apart, in rows 24" apart. Hill plants with soil 2 or 3 times during season. Grown by NB. *≈9,000 seeds/oz.*

**S** \$4.00=0.5 g, sows 20 ft., ≈150 seeds **M** \$6.00=3 g, 80 ft., ≈600 seeds **LG** \$11.75=0.25 oz., ≈2400 seeds **XL** \$38.00=1 oz., ≈9000 seeds

## LETTUCE

(*Lactuca sativa*) ~24,000 seeds/oz.

**LTB VICTORIA** **Cert. BD/OG** 55 days. An excellent candidate for professional markets or for home markets. Batavian type with heavy upright heads, dark-green leaves and a juicy yet crisp thick heart in the center, crisp mild heart because of blanching of the heart by the outside leaves. Good holding power in heat, yet hardy. For spring through late fall. Absolutely delicious! Incredibly versatile: sown as a salad "cut and come again" type as a single variety or as a base mix with other lettuce or mustard varieties or for stand along filled out batavian heads. Grown by NB. *≈24,000 seeds/oz.*

**S** \$2.00≈50 seeds **M** \$4.00=0.25 g, ≈200 seeds **LG** \$7.00=1 g, ≈800 seeds **XL** \$9.00=4 g, ≈3200 seeds **1** oz. \$30.00≈24000 seeds

## LETTUCE, BATAVIAN (FRENCH CRISP)

**LTR6 BRONZE RODAN** (red deer tongue) **Cert. BD/OG** 65 days. Reddish lettuce somewhere between romaine and deer tongue in form with green hearts.

**S** \$3.00=0.25 g, ≈200 seeds **M** \$6.00=1 g, ≈800 seeds

**LT7 CANASTA** **Cert. BD/OG** 50-60 days. Red-tinged summer Batavian crisp head is the best standing summer lettuce, very sweet and free of tip burn. This strain has been grown biodynamically at Raphael Garden in California for over 15 years. It is a very dependable variety for the farmer's market and for our CSA. Grown by NB.

**S** \$3.00≈50 seeds **M** \$7.00=0.25 g, ≈200 seeds **LG** \$9.75=1 g, ≈800 seeds **XL** \$15.00=3 g, ≈2400 seeds

**LT2 DEER TONGUE, GREEN** **Cert. BD/OG 50 days. HEIRLOOM from** . Dark green leaf lettuce matures to petite tight cylindrical heads with crisp creamy yellow hearts surrounded by long pointed outer leaves. It is delicious cut in half and drizzled with garlic salad dressing. Best in spring and autumn plantings. Transplants: Sow 3/in. cover with soil LIGHTLY. Prick out to 1 apart when true leaves appear. Set outside 9-12 apart. Grown by NB.

**S** \$3.00=0.5 g, ≈400 seeds **M** \$8.00=2 g, 100 ft., ≈1600 seeds

**NEW! LTGI GREEN ICE** **Cert. BD/OG 45 days.** Compact crinkled heads with crisp, tender scrumptious leaves and delicious centers. Transplants: Sow 3/in. cover with soil LIGHTLY. Prick out to 1 apart when true leaves appear. Set outside 9-12 apart.

**S** \$3.00≈50 seeds **M** \$7.00=1 g, ≈800 seeds **LG** \$12.00=4 g, ≈2400 seeds **XL** \$28.00=0.5 oz., ≈12000 seeds

**NEW! LTB5 WINTER DENSITY** **Cert. BD/OG 54 days.** Crisp sweet succulent head lettuce combining Butterhead and Romaine characteristics. Tolerates light frost. Grown by RG.  
**Not available in 2025. Please check back in 2026.**

## LETTUCE, ROMAINE

**LT8 CIMMARON** **Cert. BD/OG 65 days. HEIRLOOM** . Antique, deep red, almost burgundy Romaine lettuce dating from the 18th century with large loose heads. Grown by NB.

**S** \$3.00=0.25 g, sows 25 ft., ≈400 seeds

**LTR5 JERICHO** **Cert. BD/OG 60 days. HEIRLOOM from** . From Israel. Large green Romaine from Israel. Upright leaves, late to bolt, stays sweet and crisp even in summer heat.

**S** \$3.00≈50 seeds **M** \$8.00=0.5 g, ≈400 seeds **LG** \$12.00=2 g, ≈1600 seeds **XL** \$30.00=15 g, ≈12000 seeds

**LT3 KALURA** **Cert. BD/OG 57 days.** Very large Cos-type green Romaine. Great taste and good heat tolerance. 1/8 gram sown in a greenhouse and transplanted will produce 25-50 heads of lettuce. Grown as a head it can be harvested young crisp with a closed light head or later with a heavy succulent and crisp giant head. Customers are wowed either way! Sorry we did not photograph it. We harvested hundreds of them for our CSA and people are anxious for spring so they can taste them again. Grown by NB.

**S** \$3.00≈50 seeds, sows 6 ft., ≈50 seeds **M** \$5.00=0.25 g, ≈200 seeds **LG** \$9.00=1 g, ≈800 seeds **XL** \$13.00=4 g, ≈3200 seeds

## LETTUCE, BUTTERHEAD/BIBB

**LTBH2 LUCINDE** **Cert. BD/OG** Exceptional green butterhead which dependably forms a nice head even in hot weather and does not bolt quickly. Juicy mild and crisp. Grown by BH.

**S** \$3.00≈50 seeds **M** \$7.00=0.25 g, ≈200 seeds **LG** \$16.00=1 g, ≈800 seeds **XL** \$28.00=3 g, ≈2400 seeds

**SALE! LT1 MIKOLA** **Cert. BD/OG 37-49 days.** Medium sized Butterhead with succulent inner core and slightly-ruffled outer leaves with light purple tinge on the edges. Does well in summer heat. Easy to grow and dependable for market gardeners. Grown by NB.

**S** \$3.00≈50 seeds **M** \$7.00=0.25 g, ≈200 seeds **LG** \$13.00=1 g, 660 ft., ≈800 seeds

## LETTUCE, LOOSE-LEAF

**NEW! LTRM MERLOT** **Cert. BD/OG 60 days.** Burgundy red loose-leaf type for "cut and come again" use. Transplants: Sow 3/in. cover with soil LIGHTLY. Prick out to 1 inch apart when true leaves appear. Set outside 9-12 inch apart.

**S** \$3.00≈50 seeds **M** \$7.00=0.25 g, ≈200 seeds

**LT9 NEW RED FIRE** **Cert. BD/OG 45 days.** Dark-red leaf lettuce, ruffled leaves, semi-heading, slow to bolt, holds its color well under difficult conditions. Grown by NB.

**S** \$3.00=0.5 g, ≈400 seeds **M** \$7.00=2 g, ≈1600 seeds **LG** \$13.00=7 g, ≈5000 seeds

**SALE! LT6 RED TINGED WINTER** (Lattughino) **Cert. BD/OG 60 days.** Winter type of lettuce. Hardy to -5 F. Fall plant for early spring heads. Gets bitter in hot weather. Great for overwintering. Good for heads or for cutting for salad mix. First lettuce ready in the spring if sown or transplanted outside in autumn or in a greenhouse in winter. Great for a year round CSA offering! Our members can hardly wait for this in the early spring along with the overwintered spinach. Grown by NB.

**S** \$3.00=0.5 g, ≈100 seeds **M** \$7.50=2 g, ≈1600 seeds **LG** \$12.00=8 g, ≈6400 seeds

## LETTUCE, OAK LEAF

**NEW! LTO4 STRUBEL PETER** **Cert. BD/OG HEIRLOOM from Switzerland** . Strubel Peter refers to a story first published in 1845 about boy with curly and unruly hair 'adventuring' through his life.. Nevertheless, we find this good tasting green oak leaf though curly leafed, decidedly neat and trim looking as well as delicious!.

**S** \$3.00≈50 seeds **M** \$7.00=0.25 g, ≈200 seeds

**OL2 YEAR ROUND BRONZE OAK** **Cert. BD/OG 40-45 days.** This delicious oak leaf variety was developed by Harald Hoven out of Lingue de Canarino. It forms large, sweet, fast-growing heads that are late to bolt. Transplants: Sow 3/in. cover with soil LIGHTLY. Prick out to 1 apart when true leaves appear. Set outside 9-12 apart. Grown by RG.

**S** \$3.00≈50 seeds **M** \$6.00=0.25 g, ≈200 seeds

## LETTUCE MIXES ~24,000 seeds/oz.

**NEW! SM1 MEADOWLARK HEARTH SALAD MIX** **Cert. BD/OG** SALAD MIX OF Shiny Victoria, anitque red-green canasta, burgundy year round oak leaf, lacey Strubel peter, deep red merlot Grown by NB.

**S** \$4.00=0.5 g, ≈400 seeds **M** \$10.00=2 g, ≈1800 seeds **LG** \$20.00=10 g, ≈8000 seeds

## MELONS / CANTALOUPE (Cucumis melo) ~1100

seeds/oz.

**ME1 DELICIOUS 51 PMR** **Cert. BD/OG 82 days.** A northern variety with powdery mildew resistance bred in by Dr Munger and the team at Cornell Univ. Early 4-5 lb. round-oval fruit, well netted with sweet salmon-orange flesh. Excellent flavor and texture. The green line just inside the skin is an indication of a sweet cantaloupe. People line up at our farmer's market to buy this wonderful tasting variety. Sow after all danger of frost is past and soil is warm, 1/2" deep in rows 4'-6' apart, thinning to 12" apart, or in hills 4'-6' apart, 3 seeds/hill. Transplants: Start indoors 3 weeks before last frost at 80-90 F. Grown by NB. ≈1,150 seeds/oz.

**S** \$4.00=1 g, ≈35 seeds **M** \$9.00=0.25 oz., ≈275 seeds **LG** \$15.00=1 oz., ≈1100 seeds **1 lb** \$150.00

**MEL3 GOLDEN GOPHER** **Cert. BD/OG 85 days.** 6 in. fruit with deep-orange flesh and superb flavor. Resistant to fusarium wilt. 1930 development from U. of Minnesota. Make when they begin to ripen to check them everyday since they tend to enthusiastically pop with their ripeness Grown by NB. ≈1,150 seeds/oz.

**S** \$3.00=1 g, ≈20 seeds **M** \$9.00=0.5 oz., ≈500 seeds **LG** \$30.00=2 oz., ≈2000 seeds **1 lb** \$170.00

**ME3 ICE CREAM, GREEN FLESHED (GREEN MACHINE)** **Cert. BD/OG 80 days.** Sweet, prolific light green fleshed melon bred by Merl Neidens. . It is a cross between heirloom Jenny Lind and Kansas melon varieties. The flesh is green with orange on the very inside next to the seed cavity. According to Biodynamic grower Steven Adams, the flavor is absolutely exquisite: It's terrifically sweet and, has a very soft, smooth texture. For Steven in Wisconsin, it produced 20-25 fruits per moderate vine. ≈1,150 seeds/oz.

**S** \$3.00=1 g, ≈35 seeds **M** \$7.00=0.25 oz., ≈250 seeds **LG** \$9.00=1 oz., ≈1000 seeds **2+ oz.** \$8.00/ oz. bulk rate **1 lb** \$100.00

**ME9 PIKE ORANGE** **Cert. BD/OG 75-85 days.** Bred in the 1930s in Monmouth, Oregon by Aaron Pike. Fruits weigh 3-6 pounds depending on the growing conditions; irrigation will produce larger fruit. Heavily netted slightly oblong fruits are very sweet with distinctive cantaloupe flavor. Vigorous plants. . Bred specially for growing in unirrigated clay soil where there are intermittent rains. In Nebraska during a extremely dry year with drip irrigation, this variety produced a substantial crop. Sow after all danger of frost is past and soil is warm, 1/2" deep in rows 4'-6'

apart, thinning to 12" apart, or in hills 4'-6' apart, 3 seeds/hill. Transplants: Start indoors 3 weeks before last frost at 80-90 F.  $\approx 1,100$  seeds/oz.

**[S]** \$4.00=0.5 g,  $\approx 15$  seeds **[M]** \$12.00=4 g,  $\approx 120$  seeds **[LG]** \$18.00=1 oz.,  $\approx 1100$  seeds

**ME2 SHARLYN** **Cert. BD/OG 95 days.** Sometimes considered a honeydew, Sharlyn's oval fruits are somewhat netted when mature. Juicy pale green flesh with a cast of light orange in the middle. While this melon slips before it is ripe, the outside skin or rind should have a warm light orange hue and then it has a great flavor. Its flesh is tenderly firm and not sloppy wet like some melon. California grower Harald Hoven says it performs best in milder climates with a sweet smell as well as taste. In our zone 4 in Nebraska, we sowed Sharlyn in May and it ripened in Sept. We had many 100 plus degree days through the summer. Grown by RG.  $\approx 1,150$  seeds/oz.

**[S]** \$4.00=1 g,  $\approx 30$  seeds **[M]** \$7.00=0.25 oz.,  $\approx 250$  seeds **[LG]** \$13.00=1 oz.,  $\approx 1100$  seeds

## OKRA

(*Abelmoschus esculentus*)  $\sim 475$  seeds/oz.

**SALE! OK1 CLEMSON SPINELESS** **Cert. BD/OG 60 days.** HEIRLOOM from . Heirloom from 1939 All American selections. Hardy type for the north! Tall plants with large flowers followed in 5 days by tender pods that keep producing until frost. Harvest every 2-3 days when 2" long. Pod tips will snap off if tender and bend if woody. Pods are great in soups or stews. Grown by Lunquist CSA Biodynamic Farm in eastern Nebraska Grown by EL.  $\approx 500$  seeds/oz.

**[S]** \$3.00=3 g,  $\approx 48$  seeds **[LG]** \$11.00=1 oz.,  $\approx 475$  seeds **[2+ oz.]** \$5.00/ oz. bulk rate

## ONIONS

(*Allium cepa*)  $\sim 6,500$  seeds/oz.

**ON2 CLEAR DAWN ONION SEED** **Cert. BD/OG 105 days.** LONG DAY that is good for northern areas (southern areas need short day onions), mid-sized yellow storage onion selected 18 generations for high quality, long storage and uniformity by Biodynamic market gardeners. Transplants: sow inside Jan-Feb, set out 4" apart in early spring or sow out Mar-April, 1/4" deep, 3 sds" rows 12"-18" If sowing outside, use sora radish in onion row since radish is a quick to sprout and onions are slow so the radish helps mark the row. Planting in climates warmer and more south will not allow the onions to bulb up. Grown by NB.  $\approx 6,500$  seeds/oz.

**[S]** \$2.75=0.5 g,  $\approx 100$  seeds **[M]** \$6.00=2 g,  $\approx 400$  seeds **[LG]** \$15.00=0.25 oz.,  $\approx 1600$  seeds **[1 oz.]** \$28.00= $\approx 6500$  seeds **[1 lb]** \$350.00

**ON3 GIANT ZITTAU SEED** **Cert. BD/OG 100-110 days.** Delicious, yellow 4-5 inch semi-globe with excellent storage quality for Pacific Northwest. Beautiful golden skin. Sow spring, or in mild climates autumn. Introduced to us from Oregon by long time Biodynamic gardener, Heike Eubanks. Zittau has been identified as both short day and intermediate day onion but others in the bay area of San Francisco say it worked very well as a day neutral onion. Grown by HE.  $\approx 6,500$  seeds/oz.

**[S]** \$2.75=0.5 g,  $\approx 100$  seeds **[M]** \$9.00=2 g,  $\approx 400$  seeds **[LG]** \$28.00=8 g,  $\approx 1600$  seeds

**ON4 ITALIAN RED SPINDLE ONION SEED** **Cert. BD/OG 95 days.** HEIRLOOM Spindle shaped onion with a sweet, mild flavor. Matures early! Intermediate-day variety. Start in fall in mild climates. Great onion to take up the slack at the farmer's market before the storage onion types are done growing and ready to offer. Not storage type. Transplants: sow inside Jan-Feb, set out 4" apart in early spring or sow out Mar-April, 1/4" deep, 3 sds" rows 12"-18" If sowing outside, use sora radish in onion row since radish is a quick to sprout and onions are slow so the radish helps mark the row. Grown by NB.  $\approx 6,500$  seeds/oz.

**Not available in 2025. Please check back in 2026.**

**SALE! ON6 ROSA DI MILANO SEED** **Cert. BD/OG HEIRLOOM from Italy.** Beautiful red storage onion, flat shoulders and inner red and white layers. Harvest in the end of August, stores into March of following year. Transplants: sow inside Jan-Feb, set out 4" apart in early spring or sow out Mar-April, 1/4" deep, 3 rows 12"-18" If sowing outside, use sora radish in onion row since radish is a quick to sprout and onions are slow so the radish helps mark the row. Grown by NB.  $\approx 6,500$  seeds/oz.

**[S]** \$2.75=0.5 g,  $\approx 100$  seeds **[M]** \$8.00=2 g,  $\approx 400$  seeds **[LG]** \$20.00=8 g,  $\approx 3000$  seeds **[1 oz.]** \$40.00= $\approx 6500$  seeds

**SALE! ON5 VALENCIA SEED** **Cert. BD/OG 115 days.** Workhorse neutral day variety for our year round CSA here in Nebraska!!! Five stars!!! Large yellow-brown globes, very quick to size up and around 3/4 pound per onion.

This Utah strain of yellow sweet Spanish onion holds in storage through March for us in Nebraska. For all onions: Sow early as soil can be worked, 1/4" deep, 1 to 3 seeds per inch in rows 12"-18" apart. Thin at 3" high to 2" apart and again when 6" high to 4" apart. Transplants: start indoors in late winter and set out 4" apart in early spring. Transplants: sow inside Jan-Feb, set out 4" apart in early spring or sow out Mar-April, 1/4" deep, 3 sds" rows 12"-18" If sowing outside, use sora radish in onion row since radish is quick to sprout and onions are slow so the radish helps mark the row.  $\approx 6,500$  seeds/oz.

**[S]** \$2.75=0.5 g,  $\approx 100$  seeds **[M]** \$6.00=2 g,  $\approx 400$  seeds **[LG]** \$11.75=0.25 oz.,  $\approx 1600$  seeds **[XL]** \$38.00=2 oz.,  $\approx 13000$  seeds **[1 lb]** \$208.00

## OTHER ORGANIC PRODUCTS

**SF1 SUNFLOWER, TIENSVOLD** **Cert. OG** Sow approximately 3 weeks after your last frost when soil is 60-70 degrees. They are fairly tolerant of warmth and dryness but water when they show first signs of wilting. Grown by TVF.

**[S]** \$3.00=1 oz. **[M]** \$10.00=4 oz. **[LG]** \$15.00=1 lb **[5+ lb]** \$12.00/ lb bulk rate

## PARSLEY (*Petroselinum crispum*) $\sim 16,000$ seeds/oz.

**PR1 FOREST GREEN, MOSS CURLED** **Cert. BD/OG 75 days.** Vigorous, productive compact 10 in. tall plants with dark-green finely-cut, deeply-curved leaves. A high-yielding uniform strain. In the beginning, can take 2-3 weeks to germinate. Make sure to keep it watered until germination happens. Germs best in cooler weather but water can be a help to cool soil for germinating. Cultivation Instructions: Can be planted at all times of year but germinates best in the cooler time. Best sown directly into soil outside spring or autumn. Keep well watered. Do not let it dry out until signs of germination around 2-3 weeks. From transplanting, roots tend to rot later in the season that is why it is best to sow direct outside. Parsley is winter hardy even in cold climates. However it is a biennial so early in the spring, the leaves can be harvested but later in the spring the parsley plants shoot to seed. Grown by NB and SAT.  $\approx 14,000$  seeds/oz.

**[S]** \$4.00=0.25 g,  $\approx 100$  seeds **[M]** \$9.00=2 g,  $\approx 900$  seeds

**PA2 PLAIN-LEAFED ITALIAN** **Cert. BD/OG 78 days.** Flat leaf type of parsley. Fresh leaves can be picked through the season for salads and garnishes. Best picked fresh. After cutting, bunches do not hold as long as moss curled but has a very nice flavor.  $\approx 14,000$  seeds/oz.

**[S]** \$3.00=0.5 g,  $\approx 200$  seeds **[M]** \$8.00=2 g,  $\approx 800$  seeds **[LG]** \$25.00=1 oz.,  $\approx 14000$  seeds **[XL]** \$180.00=1 lb

## PARSNIPS (*Pastinaca sativa*) $\sim 5,000$ seeds/oz.

**SALE! PN1 COBHAM IMPROVED MARROW** **Cert. BD/OG 120 days.** High quality smooth tapered white roots with high sugar content and a mild coconut flavor. Cultivation instructions: Sow early to mid-spring 1/2" deep, 3 seeds per inch in rows 15"-18" apart. Thin to 3"-4" apart. Keep moist until seedlings emerge, which may take 3 weeks. Harvest in fall or overwinter for early spring harvest. If allowed to overwinter they become very sweet!!! Grown by NB.  $\approx 6,000$  seeds/oz.

**[S]** \$3.00=2 g, sows 30 ft.,  $\approx 400$  seeds **[M]** \$7.00=7 g, 100 ft.,  $\approx 1400$  seeds **[LG]** \$11.00=0.5 0.5 oz., 200 ft.,  $\approx 2800$  seeds **[4+ oz.]** \$20.00/ oz. bulk rate **[1 lb]** \$150.00

## PEAS $\sim 125$ seeds/oz

### SNAP PEAS (*Pisum sativum*)

**SP1 SUGAR LODGE** **Cert. BD/OG 65 days.** Pods sweeten slowly and gradually have an excellent sugary flavor in the fully developed pods. Eat the whole pod!!! No shelling needed. Plants hold up well in heat. Good yields! Plant 1 inch deep and 2 inches apart. Peas can tolerate frost and snow! Short supply as we need to grow it out in 2021. Grown by NB.

**[S]** \$3.00=0.5 oz., sows 5 ft.,  $\approx 60$  seeds **[M]** \$8.00=2 oz., 20 ft.,  $\approx 240$  seeds **[LG]** \$16.00=8 oz. **[XL]** \$38.00=2 lb

## **SNOW PEAS** (*Pisum sativum*)

**NEW! PP2 SCHWEIZER RIESEN** (Swiss Giant) Cert. BD/OG 70 days. An old Swiss HEIRLOOM with large, tender, tasty snow pea. The most delicious snow pea we have ever eaten. 5 ft. purple-flowered vines need trellising. Harvest when the peas are fat inside pod and use whole pod then the sweetest. Sow seeds outdoors 4 to 6 weeks before last spring frost, when soil temperature reaches between 40- 45 degrees F. Plant 1 inch deep and 2 inches apart. Peas can tolerate frost and snow! Grown by NB.

**S** \$3.00=0.5 oz., sows 3 ft., ≈50 seeds **M** \$10.00=2 oz., 40 ft. **LG** \$48.00=1 lb, ≈2000 seeds

## **PEPPERS**

Averages 4,000 seeds/oz.

## **SWEET PEPPERS** (*Capsicum annuum*)

**LG** =8 g, ≈850 seeds **1 oz.** ≈3500 seeds

**NEW! PS6 EARLY RED SWEET** Cert. BD/OG Delicate thin-walled medium-small Bell-type fruit. Turns red long before other bell peppers. If you are trying to have early red sweet peppers in the north, this is your pepper. Its harvest is quite prolific, dependable for CSA's, farmer's markets and restaurants.

**S** \$3.00=1 g **M** \$10.00=4 g **LG** \$20.00=15 g **1 oz.** \$48.00

**SP8 GENEROUS YELLOW GIANT (YELLOW MONSTER)** Cert. BD/OG 95 days. Fruits are large approximately 4 inches long and 3 inches wide. Truly a giant bell pepper whose green stage is quite delicious because of the crunchy yet juicy texture of the pepper fruits. When mature, it turns a lemony yellow and continues its delicious juicy texture. Pepper plants are not always prolific providing 2 but sometimes 5 or 6 peppers. Because these peppers are so large they can often weigh over a half pound. Also known as yellow monster, we chose to name it something a little more gentle which we feel better suits its generosity in producing such large peppers.

**S** \$4.00=0.25 g, ≈20 seeds **M** \$10.00=1 g, ≈100 seeds **LG** \$22.00

**PS1 JIMMY NARDELLO** Cert. BD/OG 78 days. The 4-8 inch narrow sweet fruit with thin walls are a wonderful treat raw or cooked. Jimmy Nardello's mother brought this variety with her from Italy to the U.S. in 1887. Germ is 66 percent so there will be a bit extra in your packets so we have lowered the price on larger amounts.. Federal germ standards are 55 % for peppers. This lot tested at 65% this year. Grown by NB.

**S** \$3.00=0.5 g, ≈45 seeds **M** \$8.50=2 g, ≈200 seeds **LG** \$15.50=0.25 oz., ≈850 seeds

**SALE! PS2 KING OF THE NORTH, SELECT** Cert. BD/OG 68 days. Wonderful sweet pepper with deep green bells, thick-walled. We have selected this variety for around 30 years and the fruits of King are one of the earlier ones to turn red with plants able to bare 4-9 red peppers at a time while they are ripening to red. Sturdy cold tolerant plants. We selected it for years toward higher production and disease resistance. Cultivation: Sow indoors 4 seeds/in", " deep at 80-90 F, 8 weeks before transplanting outside. Prick out seedlings to 2"-3" apart when true leaves appear. Set outside after hardening off when soil is warm. And frost is past, 12"-18" apart in rows 24"-36" apart. Grown by NB.

**S** \$3.00=0.5 g, ≈55 seeds **M** \$10.00=2 g, ≈230 seeds **LG** \$32.00 **1 oz.** \$45.00 **2+ oz.** \$40.00/ oz. bulk rate

## **HOT PEPPERS** (*Capsicum annuum*)

**HP4 BOLIVIAN RAINBOW** (*C. frutescens*) Cert. BD/OG 75-85 days. Plants colorfully decked with a rainbow of 1 in. fruits. Some purple, some deep-yellow developing to red as they mature. HOT!

**S** \$4.00≈10 seeds

**ps5 CORNO DI TORO (BULL'S HORN)** Cert. BD/OG Very mildly hot. Tapering fruits are 6-8 in long and narrow, often with the slight bull horn curve for which they are named, with deep crimson red color when fully ripe. Plants are very vigorous with an excellent upright habit. Upright habit 8-10 fruits. The taste is on the edge of the sharpness prior with a light touch of heat. Grown by NB.

**S** \$3.00≈25 seeds, ≈25 seeds **M** \$8.00=1 g, ≈120 seeds

**HP2 JALAPENO** Cert. BD/OG 70 days. Early and productive strain. Very meaty, thick walls. 2 in. sausage shaped fruits are deep green ripening to bright red. Mildly hot.

**S** \$3.00≈25 seeds, ≈25 seeds **M** \$7.00=1 g, ≈100 seeds **LG** \$15.00=4 g, ≈400 seeds

## **PUMPKINS** (*Cucurbita pepo*)

**NEW! PU4 HOWDEN** Cert. BD/OG Size variety is the attribute of Howden. 1970 open pollinated by John Howden. Great color and wonderful variation that is missing from hybrids. In other words, Howden does produce some large pumpkins of 15-20 inches tall but also some smaller pumpkins for all the varied sizes in a family when they want to choose the pumpkin just right for their ability to carry it out of the field! ≈140 seeds/oz.

**S** \$4.00=3 g, ≈15 seeds **M** \$12.00=15 g, ≈70 seeds **LG** \$20.00=2 oz., ≈280 seeds **XL** \$170.00=1 lb, ≈2240 seeds

**PU3 NEW ENGLAND PIE** Cert. BD/OG 100-105 days. The classic pie pumpkin. 10-12 in. diameter fruits with thick yellow flesh. Makes cute Jack-o-lanterns. Stores well. Sow outside in rows or hills after danger of frost is past and soil has warmed, sow 1/2"-1" deep, 4" apart in rows 6'-8' apart, thinning to 1' between plants, or plant 3-5 seeds per hill in hills 5'-6' apart. ≈250 seeds/oz.

**S** \$3.00=2 g, ≈16 seeds **M** \$5.00=8 g, ≈70 seeds **LG** \$9.00=1 oz., ≈200 seeds

**PU2 PUMPKIN, STYRIAN, NAKED-SEEDED** Cert. BD/OG 90-120 days. HEIRLOOM known from Styrian area in Austria where they are pressed for oil. Large, green/orange striped pumpkin grown for its seeds. Seeds are delicious eaten raw or pressed for oil, or press for oil. Flesh can be used for soups but is also good for animals for animals. Extract the seeds from the pumpkins, rinse and dry seeds carefully on racks. ≈135 seeds/oz.

**S** \$3.00≈10 seeds **4+ oz.** \$11.00/ oz. bulk rate

## **RADISHES** (*Raphanus sativus*) ~2,500 seeds/oz.

**RD1 BLACK STORAGE** Cert. BD/OG 60-80 days. HEIRLOOM from time of pyramids, brought to the Americas in the 1500s. Large, 3-6 in. round roots with deep-black skin, solid white flesh. Sow near the summer solstice in June for autumn harvest and winter storage and then enjoy all winter long. Good for winter tonic as a salad or adding to a pot of beans helps to curb flatulence. Grown by LH. ≈2,500 seeds/oz.

**S** \$2.75=1 g, ≈70 seeds **M** \$7.75=0.5 oz., ≈1250 seeds **LG** \$14.00=2 oz., ≈5000 seeds

**NEW! RD3 DAIKON, MIYASHIGE** Cert. BD/OG Traditionally for fall harvest, sow this heirloom late spring early summer. Juicy and flavorful, can be used fresh in salads, cooked in vegetable dishes, pickled, used in kim chee, or grated and mixed with ginger and soy sauce to make a dip. Also used as a tenacious cover crop. Usually harvested when 12 in. long and 2-3 in. in diameter, though it will grow much larger! Tested negative for black rot and black leg. Sowing in early spring will stimulate them to bolt rather than store. Grown by NB. ≈2,500 seeds/oz.

**S** \$2.75=0.5 g, ≈50 seeds **M** \$12.50=4 g, ≈400 seeds

**SALE! RD2 SORA** Cert. BD/OG 28 days. Early spring as soon as the soil can be worked since radishes can stand some frost. For radishes in 28 days. Consistent in size with good taste. Best sown when it is cool. Sow every 10 days for a continuous supply. Can be sown in the early autumn too. Can get quite large without sponginess. Sow 1/2" deep and 1" apart in rows 6"-12" apart. Grown by BH and SAT. ≈2,500 seeds/oz.

**S** \$2.75=2 g, sows 5 ft., ≈175 seeds **M** \$6.50=0.5 oz., ≈1200 seeds **LG** \$18.00=2 oz., 80 ft., ≈5000 seeds **5+ oz.** \$9.50/ oz. bulk rate

## **RUTABAGA**

**NEW! RT1 JOAN** Cert. BD/OG Joan is a rutabaga which is like a turnip but it is yellow orange and stores all winter long. Joan is in fact one of the best rutabagas for flavor and over all texture. Sow outside beginning in July at least 50 days before your first autumn frost and keep moist until germinated in the summer heat. Thin to 3 inches in rows at least 12 inches apart. Grown by NB. ≈7,500 seeds/oz.

**S** \$3.00=1 g, ≈250 seeds **M** \$7.00=4 g, ≈1000 seeds **LG** \$25.00=15 g, ≈15000 seeds

# SCALLIONS

(*Allium fistulosum*)

**SH1 DUTCH GOLD BULBS** (french froglegs) **Cert. BD/OG** These shallot bulbs can be planted either in the later autumn or early spring to produce very early scallions. Keeping them in the ground later than spring will result in them forming shallot bulbs or the next year's shallots. Wonderful flavor early in salads or lovely caramelized in any cooked dish. Grown by NB.

**S** \$10.00=0.25 lb **M** \$23.99=1 lb, 16 ft., ≈30 seeds **LG** \$62.00=3 lb **XL** \$125.00=10 lb

**SN3 FLAGPOLE** **Cert. BD/OG** Blue-green leaves, Flagpole scallions if given space can grow to 2 feet tall with a substantial base around 1/2 inch wide. If planted tightly they are like most other scallions but somewhat taller. Grown by NB. ≈7,500 seeds/oz.

**Not available in 2025. Please check back in 2026.**

**ON4 ITALIAN RED SPINDLE ONION SEED** **Cert. BD/OG 95 days. HEIRLOOM** Spindle shaped onion with a sweet, mild flavor. Matures early! Intermediate-day variety. Start in fall in mild climates. Great onion to take up the slack at the farmer's market before the storage onion types are done growing and ready to offer. Not storage type. Transplants: sow inside Jan-Feb, set out 4" apart in early spring or sow out Mar-April, 1/4" deep, 3 sds" rows 12"-18" If sowing outside, use sora radish in onion row since radish is a quick to sprout and onions are slow so the radish helps mark the row. Grown by NB. ≈6,500 seeds/oz.

**Not available in 2025. Please check back in 2026.**

# SHALLOTS

**SH1 DUTCH GOLD BULBS** (french froglegs) **Cert. BD/OG** Has a beautiful golden copper skin which protects the sweetest flavor of one of the longest storing shallots available. Two ways to use: #1: plant them in the autumn or spring in a hoophouse for early scallions. Fall planted shallots do form a hard stem that sends up a seed stalk. Scallions from Shallot bulbs are ready to harvest in early spring so they bridge the need for onions well. #2: Harvesting the dried down bulbs in the autumn, using them through the winter. Cultural notes: Harvested green in early summer use as scallions. Fall harvested bulbs: Allow to dry and cure in bins or netted sacks under cover. Under proper storage conditions they will last for 5-7 months. 2024 harvest yielded larger bulbs than 2023 and there are about 35 per lb Grown by NB.

**S** \$10.00=0.25 lb **M** \$23.99=1 lb, 16 ft., ≈30 seeds **LG** \$62.00=3 lb **XL** \$125.00=10 lb

**NEW! SH3 ED'S RED** **Cert. BD/OG** This is an excellent open-pollinated shallot, improved by farmer/breeder Beth Rasgorshek of Nampa, Idaho, and re-introduced by Fedco. It has red skins and purple/white flesh. Besides tasting great and growing to a large size, its biggest selling point is its ability to keep well in storage for up to a year! You could still be eating these shallots as you're picking next year's! Matures in 105 days. ≈6,500 seeds/oz.

**S** \$4.00=0.5 g, ≈100 seeds **M** \$12.00=2 g, ≈400 seeds **LG** \$25.00=15 g, ≈3000 seeds

# SPINACH

(*Spinacia oleracea*) ~2,150 seeds/oz.

**COS1 BUTTERFLAY** **Cert. OG** or **DS1 BUTTERFLAY** **Cert. BD/OG 45 days.** Available cert BD/OG DS1 or cert organic COS1 on sale: see below: Vigorous early spinach with medium dark-green savoyed leaves and a full rich flavor. Quick-growing and late-bolting. Very dependable open pollinated variety in the spring and has overwintered nicely here in Nebraska with protection of hay bales to the north of the bed. Temperatures here can be -30 below F this past winter and it still overwintered. It rivals many hybrid varieties because it is from Biodynamic breeding and selection in Switzerland and Germany. Cultivation instructions: Very early spring plant successions every 7-10 days, 1/2" deep and 1" apart in rows 12"-15" apart. For fall and winter sow late summer until 6 weeks before 20 F nights. ≈2,150 seeds/oz.

**Catalog # COS1**, Grown by BH and SAT:

**S** \$4.00=4 g, sows 30 ft., ≈300 seeds **M** \$7.00=1 oz., 200 ft., ≈2000 seeds **LG** \$20.00=4 oz., 800 ft., ≈8000 seeds **1 lb** \$45.00=3200 ft., ≈128000 seeds

**Catalog # DS1**, Grown by BH and SAT:

**S** \$4.00=4 g, sows 30 ft., ≈300 seeds **M** \$7.00=1 oz., 200 ft., ≈2000 seeds

**NEW! SS4 GAMMA Cert. OG 52 days.** Later ripening, long standing variety, dark green leaves. In our informal trials, Gamma was one of the last to bolt. Grown by SAT.  $\approx 2,200$  seeds/oz.

**[S]** \$3.00=3 g **[M]** \$7.00=15 g **[LG]** \$10.00=1 oz. **[XL]** \$18.00=2 oz.

**GR1 KOMATSUNA (Spinach Mustard) Cert. BD/OG 45 days.** NOT in the Spinach family. Tender mild glossy dark-green leaves up to 12 in. long. Sown like spinach, but germinates more quickly, especially in a cold season. Does not have oxalic acid as is found in regular spinach, making it preferred by some people to regular spinach. Grown by NB.  $\approx 12,500$  seeds/oz.

**[S]** \$3.00=0.5 g,  $\approx 200$  seeds **[M]** \$7.00=2 g,  $\approx 800$  seeds **[LG]** \$15.00=15 g,  $\approx 6000$  seeds

**GRA1 YUKINA SAVOY (brassica rapa) Cert. BD/OG** This deep green colored rich full flavor Asian green is delicious in spring and the autumn. Will bolt in the summer. Gives a satisfying boost in nutrition eaten raw or sauteed. For people who have trouble digesting spinach because of the oxalic acid, this brassica type of green is a possible alternative.  $\approx 12,500$  seeds/oz.

**[S]** \$3.00=0.5 g, sows 10 ft.,  $\approx 200$  seeds **[M]** \$5.00=2 g, 40 ft.,  $\approx 800$  seeds **[LG]** \$12.00=15 g, 600 ft.,  $\approx 6000$  seeds **[XL]** \$25.00=2 oz., 2400 ft.,  $\approx 24000$  seeds

## SQUASH, SUMMER *(Cucurbita pepo)*

**ZU3 RHEINAU GOLD DUO ZUCCHINI Cert. BD/OG** Gold zucchini squash selected by the Biodynamic Seed Company in Rheinau Switzerland. Thick flesh and smooth skin., with very good flavor. Does throw about 5 percent green zucchinis. They sell very well at the farmer's market here in Nebraska. People like their texture too. Grown by NB.  $\approx 250$  seeds/oz.

**[S]** \$4.00=2 g,  $\approx 15$  seeds **[M]** \$9.50=0.5 oz.,  $\approx 100$  seeds **[LG]** \$33.00=2 oz.,  $\approx 400$  seeds

**ZU5 VERDE CHIARO D'ITALIA Cert. BD/OG 48 days.** Light green Italian zucchini with cylindrical fruit which are early and productive with a good taste. Abundant blossom production as well. Grown by RG.  $\approx 250$  seeds/oz.

**[S]** \$4.00=0.125 oz.,  $\approx 25$  seeds **[M]** \$10.00=0.5 oz.,  $\approx 100$  seeds **[LG]** \$25.00=2 oz.,  $\approx 500$  seeds

**SS1 ZUCCHINI DARK GREEN SELECT Cert. BD/OG 52 days.** This open pollinated zucchini performs as well if not better than the hybrids we have tried. Our Dark Green Select is DARK green and has been a constant at our farmer's market every summer. While succession plantings can be done, our dark green lasts until the first hard frost in September or October. We personally selected this variety for field resistance in the difficult wet climates of eastern US where there cucumber beetles bring bacteria wilt. Our work is inspired by Raoul Robinson, a stellar Canadian breeder who wrote "RETURN TO RESISTANCE". Our selected strain of this zucchini is dark green, with smooth fruits and firm white flesh with good taste raw or cooked. We rely on Dark Green's production for our farmer's market here in Nebraska all season long. Grown by NB.  $\approx 250$  seeds/oz.

**[S]** \$4.00=0.125 oz.,  $\approx 25$  seeds **[M]** \$7.00=1 oz.,  $\approx 250$  seeds **[1 lb]** \$90.00

## SQUASH, WINTER *(Cucurbita spp.)*

**MX1 BLUE BALLET JSS SELECT Cert. BD/OG** Delicious and the best of the small hubbard types with deep orange flesh and Blue-green skin. Fits easily into the oven and stores into late spring Very delicious. Bred by Johnny's Selected Seeds. We are grateful to have permission from JSS to grow this variety out Biodynamically. If you plan to grow this for seed production, we recommend that you speak with Rob Johnstan at Johnny's Select Seeds to ask permission. It is always best to ask the breeder for permission for stock seed since makes sure to keep the seed variety uncontaminated.  $\approx 85$  seeds/oz.

**[S]** \$3.00 $\approx 10$  seeds, sows 10 ft. **[M]** \$11.00=0.5 oz., 40 ft.,  $\approx 40$  seeds **[LG]** \$20.00=2 oz., 150 ft.,  $\approx 160$  seeds

**WS8 BUTTERNUT (C. moschata) Cert. BD/OG 100 days.** Long, light-tan bottle shaped winter storage variety. Finely-grained golden-orange flesh is deliciously sweet and good for pie. For US east coast growers, most resistant squash-type to bacterial wilt. Sow outside in rows or hills after danger of frost is past and soil has warmed, sow 1/2"-1" deep, 4" apart in rows 6'-8' apart, thinning to 1' between plants, or plant 3-5 seeds per hill in hills 5'-6' apart. For larger quantities of butternut type check our nutter butter offering which is WS 9 in our Meadowlark Hearth catalog. Grown by RG.  $\approx 300$  seeds/oz.

**[S]** \$4.00=3 g,  $\approx 35$  seeds **[M]** \$8.00=0.5 oz.,  $\approx 150$  seeds

**NEW! WSP4 DELICATA, ZEPPELIN** Cert. BD/OG Deliciously sweet. Yellow with green and orange stripe, elongated shape and stores a little way into January. Our original source is from Wild Garden seed with a very interesting story about John Eveland providing seed that he had saved in the 90's after there was a bitter squash which got into the main body of commercial delicata seed. Baking this squash at 350 for up to an hour provides a real treat without sugar. Adding a little cinamon spice makes it real nice!

**S** \$4.00=3 g **M** \$11.00=1 oz.

**WS7 HONEYNUT** (*cucurbita moshata x maxima*) Cert. BD/OG The rave reviews from our CSA customers of the flavor were almost unanimous. These mini 4-5 inch butternut are very high in sugar content. They are green before their ripening finishes then they turn a dark buff color similar to their relative: .regular butternut squash. Not a storage type! Lasts through Thanksgiving. Each time we grow them as seeds people we select the longest storing squash. Customers cannot get enough of them. Bred by Cornell University with some resistance to powdery mildew which is prevalent in the eastern US. Sow outside in rows or hills after danger of frost is past and soil has warmed, sow 1/2"-1" deep, 4" apart in rows 6'-8' apart, thinning to 1' between plants, or plant 3-5 seeds per hill in hills 5'-6' apart. Grown by NB. *~300 seeds/oz.*

**S** \$3.00=3 g, *~30 seeds* **M** \$9.00=0.5 oz., *~150 seeds* **LG** \$20.00=2 oz., *~600 seeds* **XL** \$70.00=0.5 lb, *~2400 seeds* **1 lb** \$120.00=*~4800 seeds*

**WS5 KINDRED ORANGE BUTTERCUP** (*C. maxima*) Cert. BD/OG 90 days. Early buttercup with turbaned 3-5 Lb. fruits ripening to a reddish-gold. Golden-yellow flesh. Vining plants. This petite buttercup is an optimum size for a two person serving. Earliest ripening maxima squash that we know of. Has been sought by cold climate gardeners in Alaska because it is one of the few varieties which will ripen there. Sow outside in rows or hills after danger of frost is past and soil has warmed, sow 1/2"-1" deep, 4" apart in rows 6'-8' apart, thinning to 1' between plants, or plant 3-5 seeds per hill in hills 5'-6' apart. Grown by SA. *~150 seeds/oz.*

**S** \$4.00=3 g, sows 12 ft., *~15 seeds*

**WSBB MOSCHATA BUTTERBABY** Cert. BD/OG These are sweet butternut type babies, perfect for a meal for one or 2 people so delicious there will be no leftovers. Their size is human hand sized or comparable to a large sweet potato. Also, good for pies soups sauces. Besides being small fruits, they are modest spreading plants and thus helpful for the home gardener wanting to curb the growth of a winter squash in a smaller garden! Market gardeners looking for dainty squash to sell to apartment dwellers..here is a good one! Great winter storage that doesn't take a lot of space! *~290 seeds/oz.*

**S** \$4.00=1 g, sows 10 ft., *~10 seeds* **M** \$12.00=7 g, 170 ft., *~70 seeds*

**WS4 NATIVE AMERICAN HIDATSA** (*C. maxima*) Cert. BD/OG 100 days. HEIRLOOM from . from the Hidatsa native people who gardened on the Missouri River near a place called at the time Like a Fish Hook. Hubbard-type or french pumpkin type fruit with reddish pink skin. Hubbard-type or french pumpkin type fruit with reddish pink skin. Excellent keeper. Thinck orange flesh at least one inch very flavorful. Outstanding ingredient for pies but also delicious by itself. Cultivation Instructions: Sow outside in rows or hills after danger of frost is past and soil has warmed, sow 1/2"-1" deep, 4" apart in rows 6'-8' apart, thinning to 1' between plants, or plant 3-5 seeds per hill in hills 5'-6' apart. Grown by NB. *~150 seeds/oz.*

**S** \$3.00=0.25 oz., *~20 seeds*

**PU3 NEW ENGLAND PIE** Cert. BD/OG 100-105 days. The classic pie pumpkin. 10-12 in. diameter fruits with thick yellow flesh. Makes cute Jack-o-lanterns. Stores well. Sow outside in rows or hills after danger of frost is past and soil has warmed, sow 1/2"-1" deep, 4" apart in rows 6'-8' apart, thinning to 1' between plants, or plant 3-5 seeds per hill in hills 5'-6' apart. *~250 seeds/oz.*

**NEW! TO5 WONDER BERRY** **Cert. BD/OG** (*Solanum burbankii*) [Developed by plant genius Luther Burbank.] 3 ft. plants yield dozens of clusters of dark, in. berries; each cluster holds 8-12 fruits. Unique, huckleberry-like flavor makes for intriguing dessert fillings, jellies, syrups, etc. Green fruits are likely toxic and should not be consumed.

**S** \$3.00 $\approx$ 100 seeds **M** \$8.00=0.25 g

## TOMATO

Averages 7000 seeds/oz.

**NEW! TMP2 STREAK LIGHTNING** **Cert. BD/OG** Red with yellow antique streaking ,slightly elongated fruit usually with a tail make this new introduction from Wild Boar Farm in California very enticing. TASTE is the next surprise, with a fruity and full tomato flavor, this tomato will definitely become a lasting variety to become an heirloom. Fruits

are around 3-4 ounces with a few going to 6 ounces. Both good sauce and fresh eating.. Customers at our farmer's market always would buy them after tasting them. Grown by NB.

**S** \$3.00≈10 seeds **M** \$9.00≈50 seeds, ≈50 seeds **LG** \$18.00=1 g, ≈225 seeds

**TDW1 DWARF FRED'S TIE DYE** **Cert. BD/OG 75 days.** Don't be fooled by the term dwarf. Large tomatoes from space saving plants. Plants can be 5 ft but they tend to have such a strong center stem that they can be more easily grown in large pots with minimal support. Quite easily grown in fields and green houses too. Vigorous, productive with fruit that are medium to medium-large sized (five to six ounce average), round, purple with jagged green stripes and the deep crimson flesh of black tomatoes. 'Fred's Tie Dye' has a rich, intense, balanced flavor for fresh eating and delicious saucing. Originally from the cooperative project: <https://www.craiglehoullier.com/dwarf-tomato-breeding-project> It was selected from a cross between 'Dwarf Wild Fred' and 'Pink Berkeley Tie Dye' made by Vince Lavallo, who also named it. Among those who contributed to stabilizing this "Dwarf Tomato Project" variety were Vince, Lyne Rancourt, Ted Maiden, Lisa Moore, Connie Dockler, Richard Watson, Gina McDermott, Bill Yoder, Simone Pennig, Scott Stough, Donna Marie Kudrak, Marsha Eisenberg, Antoniette Koshykar, Bill Minkey, and Craig LeHoullier. Introduced in 2015. ≈7,000 seeds/oz.

**S** \$4.00≈10 seeds **M** \$15.00=0.25 g, ≈50 seeds

## **TOMATO, EARLIEST SMALL RED**

**TE1 STUPICE** **Cert. BD/OG 58 days.** Our earliest ripening tomato. Good yields of small 3 oz. fruits with a rich sweet flavor. Performs well in cool conditions. Grown by NB.

**S** \$3.00≈25 seeds **M** \$7.00=1 g, ≈250 seeds

## **TOMATO, SLICING, RED**

**TM1 BERNER ROSE** **Cert. BD/OG 75 days.** HEIRLOOM from Europe 8-10 oz fruits with glistening tender smooth dark rose skin. Resists cracking on about 90 percent of the tomatoes. Outstanding flavor make it delicious in salads. Cooks into a good red sauce. Good seller at the farmer's market. Indeterminant. Sow inside 6 wks before last frost at 80-90 F, " deep, 4 seeds/in. Prick out when 1" high to 2"-3" apart. Set out after danger of frost, 18"-24" apart in rows 4' apart. Stake or cage indeterminate varieties for best results. Grown by NB.

**S** \$3.00≈25 seeds, ≈25 seeds **M** \$8.00=1 g, ≈200 seeds **LG** \$15.00=0.125 oz., ≈900 seeds

**TM5 CORNE DE BOUC** (Billy Goat Horn) **Cert. BD/OG 85 days.** French HEIRLOOM. Delicious unusual 5 in. long pointed fruits for fresh eating and sun-dried tomatoes, or thick sauce, with a slight smoky deep rich sweet flavor. Name means goat's horn. Late ripening. Does best with being trellised. Indeterminant so it needs staking. Highlight of this tomato is its outstanding flavor that calls a person back for more! Grown by NB.

**S** \$4.00=0.1 g, ≈15 seeds **M** \$12.00=1 g, ≈150 seeds **LG** \$28.00=4 g, ≈800 seeds

**NEW! TM10 CRNKOVIC** **Cert. BD/OG 85 days.** HEIRLOOM from from Yugoslavia traveling to the US via Yasha Crnkovic. It is disease-resistant producing mostly large 8 oz -1 lb pink beefsteak fruit with some small fruit.. (Indeterminate means it keeps growing all season long and could use staking. Grown by NB.

**S** \$3.00≈25 seeds, ≈25 seeds **M** \$6.00=0.5 g, ≈100 seeds

**TMS3 FIREWORKS** **Cert. BD/OG 70 days.** Early red 6-10 oz. Fruits with very little cracking. Quick Determinant type yielding lots of red fruit for about in a 3-5 week period. Great for fresh eating or flavorful sauce. Grown by NB.

**S** \$3.00=0.25 g, ≈50 seeds **M** \$8.00=1 g, ≈200 seeds **LG** \$20.00=0.25 oz., ≈1800 seeds **XL** \$30.00=1 oz., ≈7000 seeds

**TM3 KATJE** **Cert. BD/OG 60 days.** Early, large fruits up to 8 oz. taste similar to Brandywine types, but earlier maturing. Our strain came from Adaptive Seeds who recommended it. We agree that its earliness and delicious flavor make it a real winner. Our Friends at Seed Ambassadors say: "Pink 3-5" slicer tomato, very early and reliable. Gorgeous and delicious, Originates in Sludjanka at the shores of lake Bajkal in Siberia, where it is grown outdoors. It is not clear whether it was developed by Katarina Konovna Sviatova (Katja) herself, or if it is an old Russian commercial variety, received from Sren Holt of Frsamlerne (Danish seed savers) who received it from the Sviatova family in Siberia." Grown by NB.

**S** \$3.00≈25 seeds, ≈25 seeds **M** \$8.00=1 g, ≈200 seeds **LG** \$10.00=0.125 oz., ≈900 seeds

**NEW! TMR1 MOSKVICH Cert. BD/OG 70 days.** Early, smooth globe-shaped red fruit with small stem scar, 4-6 oz., smooth texture, rich taste, from Eastern Siberia. Grown by NB.

**[S] \$3.00≈25 seeds [M] \$6.00=1 g, ≈200 seeds [LG] \$30.00=0.5 oz., ≈3500 seeds**

**NEW! TMP9 MYONA Cert. BD/OG 80 days. HEIRLOOM from .** Italy. Given to us by John Rahart. His father living in New Jersey went to the farmer's market there and bought some tomato plants from a vendor. They were terrific so he returned to the vendor and asked what the name of the tomato was. The answer: "It's a my own a. " ! 3-4oz. pear paste type. Good flavor, excellent yields. This variety appears to acclimate to where it is grown in that the first year it is smaller and then when you save your own seed, it produces larger fruits the ensuing years.

**[S] \$3.00≈25 seeds, ≈25 seeds [M] \$6.00=0.5 g, ≈100 seeds**

**NEW! TMR9 SOLAR FLARE Cert. BD/OG** A work horse at the Wild Boar Farm, repeatedly selected for flavor. Luscious, slightly sweet, full tomato flavor. Head turning fruits are red striped with gold, very meaty and weigh 6-8 oz. Early with good scab resistance. Indeterminate, 75 days from transplant. Attention seed growers: PROPRIETARY, Need permission from Wild Boar Farm to grow and market this seed. For growing the fruit for marketing, no permission is needed.

**[S] \$3.00≈10 seeds**

**TM2 SUPER LAKOTA (Super Sioux) Cert. BD/OG 75 days.** Abundant producers of fleshy 6 to 8 oz fruits. Excellent slicers, very juicy, with good old-fashioned flavor. Plants stand up well in both wet and dry summers. A great early ripening all around medium sized tomato which appeals to farmer's market customers. Semi-determinant plant type means that it does not have to be trellised but can be if you want to save room. Sow indoors 6 weeks before last frost at 80-90 F, " deep, 4 seeds/in. Prick out when 1" high to 2"-3" apart. Set out after danger of frost, 18"-24" apart in rows 4' apart. Grown by NB.

**[S] \$3.00=0.2 g, ≈25 seeds [M] \$7.00=0.5 g, ≈100 seeds [LG] \$12.00=2 g, ≈400 seeds [XL] \$24.00=8 g, ≈1600 seeds**

## ***TOMATO, SLICING, NON-RED***

**NEW! TMB BRANDYWINE, SUDDUTH STRAIN Cert. BD/OG 85-90 days.** Heirloom potato-leaf variety with large, dark pink to rosy red slightly flattened and somewhat ribbed fruit with outstanding flavor. Needs staking and around 90 days for ripe fruit. Half lb to 2lb fruits from the Suddruth family, a 100 + dependable producer. Grown by NB.

**[S] \$4.00≈15 seeds [M] \$12.00=0.5 g, ≈100 seeds**

**TM8 DJENA LEE'S GOLDEN GIRL Cert. BD/OG 80 days.** This Minnesota HEIRLOOM won first prize in the Chicago World's Fair in the 1930's. Prolific clusters of light yellow 6 oz. fruits. Cultivation instructions: Sow indoors 6 weeks before last frost at 80-90 F, " deep, 4 seeds/in. Prick out when 1" high to 2"-3" apart. Set out after danger of frost, 18"-24" apart in rows 4' apart. Grown by NB.

**TM6 BLACK CHERRY** Cert. BD/OG 85-90 days. **HEIRLOOM** from . Indeterminant plants produce an abundant yield of cherry-sized, garnet-colored delectable fruits. Add them to salad for a nice color variation or eat them on their own to fully enjoy their complex, sweet flavor. Indeterminant.: needs staking. Sow indoors 6 weeks before last frost at 80-90 F, " deep, 4 seeds/in. Prick out when 1" high to 2"-3" apart. Set out after danger of frost, 18"-24" apart in rows 4' apart. Stake or cage indeterminate varieties for best results. Grown by NB.

**[S]** \$3.00≈25 seeds **[M]** \$6.00=0.5 g, ≈100 seeds **[LG]** \$20.00=4 g

**NEW! TCH1 CHADWICK CHERRY** **Cert. BD/OG 85-90 days.** Exceptionally delicious cherry tomato with abundant harvest from the work of Alan Chadwick, pioneer of bio-intensive gardening in the U.S. Grown by NB.

**[S] \$3.00≈25 seeds**

**TCH2 JAUNE FLAMME** **Cert. BD/OG HEIRLOOM from France** . Deliciously sweet small yellow/orange small fruits 2-3 ounces, very prolific. Cultivation instructions: Sow inside 6 wks before last frost at 80-90 F, " deep, 4 seeds/in. Prick out when 1" high to 2"-3" apart. Set out after danger of frost, 18"-24" apart in rows 4' apart. Stake or cage indeterminate varieties for best results. Grown by NB.

**[S] \$3.00≈15 seeds, ≈15 seeds**

**TM4 MATT'S WILD** **Cert. BD/OG 65-70 days. Indet.** Everyone should have at least one plant of these in their garden. This little grape-sized red cherry tomato is packed with sweet, juicy flavor and is a quick favorite for all who try it. Children love it! Germinates best at a constant 78 degrees. Once germinated, we found the plants remained healthy even in cool wet climates. Produces beautiful trusses of ripe fruit which can be harvested complete for farmer's markets. It stores better and is very attractive when the whole truss is clipped, instead of picking individual tomatoes. Teresa Arellanos de Mena from Hildago in eastern Mexico collected and shared this variety with her friend and colleague, Matt Liebman of the U. of Maine Ag School, who saved seeds and passed them on to Johnnys Selected Seeds. We are grateful to Johnnys for permission to offer this variety, and to Teresa and Matt who collected and saved it. Grown by NB.

**[S] \$3.00≈15 seeds, ≈15 seeds [M] \$8.00=0.5 g, ≈100 seeds**

**NEW! TCH3 SNOW WHITE CHERRY** **Cert. BD/OG 70-75 days.** Not exactly white, this small pale yellow fruit is exceptionally sweet and gives a nice contrast to the red cherry tomatoes

**[S] \$3.00≈15 seeds**

**TE1 STUPICE** **Cert. BD/OG 58 days.** Our earliest ripening tomato . CRACK RESISTANT! Copious yields of small 3 oz. plus fruits with a rich sweet flavor.. Long storage. Performs well in cool conditions. AND also does very well in a green house situation too! So does well in heat too! Grown by NB.

**[S] \$3.00≈25 seeds [M] \$7.00=1 g, ≈250 seeds**

**NEW! TS1 SWEET'N BRIGHT (Hellfrucht)** **Cert. BD/OG 80 days.** Mid-season tomato with cascades of bright red 2-3 oz. round fruit. Good producer & disease resistance in greenhouse and field. No cracking.

**[S] \$4.00≈25 seeds [M] \$8.00≈100 seeds**

## **TOMATO, UNIQUE**

**TM5 CORNE DE BOUC (Billy Goat Horn)** **Cert. BD/OG 85 days.** French HEIRLOOM. Delicious unusual 5 in. long pointed fruits for fresh eating and sun-dried tomatoes, or thick sauce, with a slight smoky deep rich sweet flavor. Name means goat's horn. Late ripening. Does best with being trellised. Indeterminant so it needs staking. Highlight of this tomato is its outstanding flavor that calls a person back for more! Grown by NB.

**[S] \$4.00=0.1 g, ≈15 seeds [M] \$12.00=1 g, ≈150 seeds [LG] \$28.00=4 g, ≈800 seeds**

## **TURNIPS (Brassica rapa)**

**TN 3 GOLDEN BALL** **Cert. BD/OG** Delicious Foilage and mild tasting root slightly yellow. Direct sow for best results. Mild flavor if grown during the cool part of the year. Grown by NB. ≈11,250 seeds/oz.

**[S] \$3.00=0.5 g, sows 20 ft., ≈130 seeds [M] \$7.00=2 g, 80 ft., ≈400 seeds [LG] \$12.00=8 g, 320 ft., ≈1600 seeds**

**s**

**TN1 ZUERCHER** **Cert. OG 50 days.** Purple skin on the top of the root, white below. White flesh throughout. Uniform and good storage. Direct sow for best results. Sow outdoors in early spring through late summer, inch deep, 1 inch apart in rows 12-18 inches apart. Mild flavor if grown during the cool part of the year. This seed is hot water treated from Switzerland Grown by SA. ≈8,000 seeds/oz.

**[S] \$3.00=0.5 g, sows 20 ft., ≈130 seeds [M] \$8.00=2 g, 80 ft., ≈400 seeds**

# UNUSUAL CROPS

**GR8 AMARA KARATE GREENS** (*brassica carinata*) **Cert. BD/OG 50-65 days.** GreensA buttery textured green grown in the cool of autumn or spring, kale like mustard with smooth texture when cooked, steamed, sti fried and great addition to salads. Rich in vitamin C and folic acid.Grown out by Harald Hoven in California. Also Known as Ethiopian Kale or Abyssinian mustard. Fpr seed buffs from Wikipedia: brassica carinata is thought to result from an ancestral hybridisation event between Brassica nigra (genome composition BB) and Brassica oleracea (genome composition CC). Considered to be in development for an oil seed crop. *≈5,000 seeds/oz.*

**[S] \$3.00=1 g, ≈500 seeds [M] \$5.00=4 g, ≈2000 seeds [LG] \$10.00=1 oz., ≈5000 seeds [XL] \$30.00=4 oz., ≈20000 seeds**

**RD1 BLACK STORAGE** **Cert. BD/OG 60-80 days.** HEIRLOOM from time of pyramids, brought to the Americas in the 1500s. Large, 3-6 in. round roots with deep-black skin, solid white flesh. Sow near the summer solstice for winter storage and then enjoy all winter long. Good for winter tonic as a salad or adding to a pot of beans helps to curb flatulence Grown by LH. *≈2,500 seeds/oz.*

**[S] \$2.75=1 g, ≈70 seeds [M] \$7.75=0.5 oz., ≈1250 seeds [LG] \$14.00=2 oz., ≈5000 seeds**

**NEW! GRRT BRISEBOIS'S RAINBOW TATSOI** **Cert. BD/OG** From Dan Brisebois of Tourne De Sol a tatsoi which has green leaves ad various hues of purple and pink on the stems. Quite hardy, beautiful and delicious. Check out his story of breeding it. <https://goingtoseed.wordpress.com/2019/02/07/how-i-bred-rainbow-tatsoi/> *≈12,000 seeds/oz.*

**[S] \$3.00=0.5 g, ≈200 seeds [M] \$9.00=2 g, ≈800 seeds [LG] \$48.00=15 g, ≈3000 seeds**

**TM5 CORNE DE BOUC** (Billy Goat Horn) **Cert. BD/OG 85 days.** French HEIRLOOM. Delicious unusual 5 in. long pointed fruits for fresh eating and sun-dried tomatoes, or thick sauce, with a slight smoky deep rich sweet flavor. Name means goat's horn. Late ripening. Does best with being trellised. Indeterminant so it needs staking. Highlight of this tomato is its outstanding flavor that calls a person back for more! Grown by NB.

**[S] \$4.00=0.1 g, ≈15 seeds [M] \$12.00=1 g, ≈150 seeds [LG] \$28.00=4 g, ≈800 seeds**

**ENV ENVELOPE FOR SEED SAVING** **Ecologically Grown** Handy BLANK PACKET for seed saving trips or going to conferences where there is a seed swap, these small but servicable envelope with measurments of 4 3/16 inch by 2 11/16 inch, their flap is with the small extension to protect seed from falling out of the envelope.

**[S] \$4.00≈12 Envelopes [M] \$7.00≈25 Envelopes**

**CB6BD FILDERKRAUT** **Cert. BD/OG** VERY LARGE but the leaves are really tender, excellent for sour kraut with good flavor and also great for early sweet cabbage. Warning: It can grow to 20 pounds if not harvested early. Grown by BH and SAT. *≈7,000 seeds/oz.*

**[S] \$4.00=0.5 g, ≈80 seeds [M] \$10.00=2 g, ≈320 seeds [LG] \$25.00=8 g, ≈1200 seeds [XL] \$75.00=1 oz., ≈6500 seeds**

**ON4 ITALIAN RED SPINDLE ONION SEED** **Cert. BD/OG 95 days.** HEIRLOOM Spindle shaped onion with a sweet, mild flavor. Matures early! Intermediate-day variety. Start in fall in mild climates. Great onion to take up the slack at the farmer's market before the storage onion types are done growing and ready to offer. Not storage type. Transplants:sow insideJan-Feb, set out 4" apart in early spring or sow out Mar-April, 1/4" deep, 3 sds" rows 12"-18" If sowing outside, use sora radish in onion row since radish is a quick to sprout and onions are slow so the radish helps mark the row. Grown by NB. *≈6,500 seeds/oz.*

**Not available in 2025. Please check back in 2026.**

**TM4 MATT'S WILD** **Cert. BD/OG 65-70 days. Indet.** Everyone should have at least one plant of these in their garden. This little grape-sized red cherry tomato is packed with sweet, juicy flavor and is a quick favorite for all who try it. Children love it! Germinates best at a constant 78 degrees. Once germinated, we found the plants remained healthy even in cool wet climates. Produces beautiful trusses of ripe fruit which can be harvested complete for farmer's markets. It stores better and is very attractive when the whole truss is clipped, instead of picking individual tomatoes. Teresa Arellanos de Mena from Hildago in eastern Mexico collected and shared this variety with her friend and colleague, Matt Liebman of the U. of Maine Ag School, who saved seeds and passed them on to Johnnys Selected Seeds. We are grateful to Johnnys for permission to offer this variety, and to Teresa and Matt who collected and saved it. Grown by NB.

**[S] \$3.00≈15 seeds, ≈15 seeds [M] \$8.00=0.5 g, ≈100 seeds**

**NEW! FLA5 RED SPIKE AMARANTH** (*Amaranthus cruentus*) **Cert. BD/OG 65-75 days.** Graceful red flower heads for late summer and autumn flower arrangements and just plain stunning in the garden! When our friend in the photo visited in Sept the the flower heads of the Red Spike were a foot or 2 taller than she is. Tiny seeds and giant plants. When the plants are young the leaves can also be eaten in salads or stir fries. 1400 seeds to a gram Grown by NB. *~40,600 seeds/oz.*

**[S] \$5.00=0.1 g, ~100 seeds [M] \$11.00=0.5 g, ~700 seeds [LG] \$20.00=2 g, ~2800 seeds**

**NEW! HTO TOBACCO, NICOTIANA TOBACUM** (*NICOTIANA, TOBACUM*) **Cert. BD/OG** Can grow in zone 3 and above but would need to be started inside just like tomatoes. Impressive for a flowering border because it grows to over 6 feet tall. Even this year when it was beaten back by golf ball size hail at our farm it rebounded to over 6 feet!

**[S] \$3.00~100 seeds [M] \$12.00=0.1 g, ~700 seeds [LG] \$25.00=1 g, ~7000 seeds**

**NEW! WHR WHEAT, TURKEY RED HEIRLOOM, HRWW** (*Triticum aestivum*) **Ecologically Grown** **Cert. BD/OG 300 days.** HEIRLOOM. Hard red winter wheat. Turkey Red is the parent to many varieties of hard red winter wheat in the United States. This Turkey Red wheat seed has been grown in Kansas since the 1870s. Straw height can reach upwards of four feet in areas with 20-inches plus moisture. It is adaptable to wet, dry, hot and cold areas. It does require a hard freeze in the winter to develop grain to harvest the following summer. Ideal for bread, but it can be used as a general-purpose flour, ornamental or cover crop. From Stephens Land and Cattle in Kansas. For larger amounts than we list call them: 785-678-7006, *~900 seeds/oz.*

**[S] \$20.00=1 lb [M] \$30.00=10 lb [LG] \$43.00=20 lb**

## **WATERMELONS** (*Citrullus lanatu*)

**NEW! WM5 ALI BABA** (*Citrullus Lanatus*) **Cert. BD/OG HEIRLOOM** . from Iraq Sweet and nice texture. Copious producer of 5-15 pound fruits in our area, light green skin, red flesh which is very quick to mature. Baker's Creek Heirloom seed company introduced this fine variety about 10 years ago after they were sent seed by Aziz Nail, an Iraqi gentleman who had collected this fantastic variety in Iraq. *~300 seeds/oz.*

**[S] \$4.00=3 g, ~25 seeds [M] \$10.00=0.5 oz., ~150 seeds**

**NEW! WM2 BLACK TAIL MOUNTAIN** (*Citrullus Lanatus*) **Cert. BD/OG 75 days.** 75 day round 8-10 Lb. lightly striped fruits with sweet, crisp, red flesh. Developed in Idaho for short season areas. In our Nebraska climate we have found it to be very reliable. A biodynamic grower in Wisconsin, was able to get melons from direct sown seed in their garden which is remarkable. This ice box melon type is probably more hardy than sugar baby which is also an ice box melon. Black Tail was bred in the Idaho mountains by Glen Drowns when he was still in high school. He and his wife own sandhill preservation center: <https://www.sandhillpreservation.com/> Grown by NB. *~675 seeds/oz.*

**[S] \$3.00=2 g, ~30 seeds [M] \$8.00=8 g, ~120 seeds [LG] \$12.00=1 oz.**

**WM9 CRIMSON SWEET** **Cert. BD/OG 90 days.** 5-15 Lb. round to oblong dark and light green striped fruit with small seeds. Very sweet deep-red juicy flesh. Resistance to strains 1 and 2 of fusarium wilt and strains 1 and 3 of anthracnose. Delicious and prolific Grown by NB. *~565 seeds/oz.*

**[S] \$4.00~25 seeds [M] \$9.00=7 g, ~100 seeds**

**NEW! WM6 TURKISH HEIRLOOM, CEKIRDEGI OYALI** **Cert. BD/OG HEIRLOOM** from Turkey. Gorgeous SEED! Each seed has a specific and unique design revealed as the seed dries and the seed skin tightens. It was introduced to the US commercial production by "Two Seeds in a Pod Seed Company" in conjunction with Southern Exposure Seeds. Brought to us by our partner intern Timothy Wood. . Fruits weight 3-5 pounds, lots of seeds, red flesh and are mildly sweet in our zone 4 short 100 day summer. Most likely much sweeter when the summer is longer for ripening.. *~300 seeds/oz.*

**[S] \$5.00=1 g, ~12 seeds**

**SHIPPING INCLUDED IN BULK PRICE**

**WM3 YELLOW MOONBEAM** (*Citrullus Lanatus*) **Cert. BD/OG 75 days.** Stabilized open-pollinated selection from Yellow Doll Hybrid. 5-8 Lb. round striped fruits with sweet flavorful yellow flesh. Matures in the North. Bred by Alan Kapular of Peace Seeds. *~575 seeds/oz.*

**[S] \$3.00=2 g, ~30 seeds [M] \$7.00=8 g, ~120 seeds [LG] \$15.00=1 oz., ~430 seeds**

# WHEAT

(*Triticum aestivum*)

**NEW! WHR WHEAT, TURKEY RED HEIRLOOM, HRWW** (*Triticum aestivum*) Ecologically Grown Cert. BD/OG 300 days. HEIRLOOM. Hard red winter wheat.
